Handbook of Research on the Efficacy of Training Programs and Systems in Medical Education Gotian, Ruth 2019-12-27 The content of medical education knowledge transfer is compounded as medical breakthroughs constantly impact treatment, and new diseases are discovered at an increasingly rapid pace. While much of the knowledge transfer remains unchanged throughout the generations, there are unique hallmarks to this generation's education, ranging from the impact of technology on learning formats to the use of standardized patients and virtual reality in the classroom. The Handbook of Research on the Efficacy of Training Programs and Systems in Medical Education is an essential reference source that focuses on key considerations in medical curriculum and content delivery and features new methods of knowledge and skill transfer. Featuring research on topics such as the generational workforce, medical accreditation, and professional development, this book is ideally designed for teachers, physicians, learning practitioners, IT consultants, higher education faculty, instructional designers, school administrators, researchers, academicians, and medical students seeking coverage on major and high-profile issues in medical education.

The Diversity Bonus Scott E. Page 2019-03-26 What if workforce diversity is more than simply the right thing to do in order to make society more integrated and just? What if diversity can also improve the bottom line of businesses and other organizations facing complex challenges in the knowledge economy? It can. And The Diversity Bonus shows how and why. Scott Page, a leading thinker, writer, and speaker whose ideas and advice are sought after by corporations, nonprofits, universities, and governments around the world, makes a clear and compellingly pragmatic case for diversity and inclusion. He presents overwhelming evidence that teams that include different kinds of thinkers outperform homogenous groups on complex tasks, producing what he calls "diversity bonuses." These bonuses include improved problem solving, increased innovation, and more accurate predictions--all of which lead to better performance and results. Page shows that various types of cognitive diversity--differences in how people perceive, encode, analyze, and organize the same information and experiences--are linked to better outcomes. He then describes how these cognitive differences are influenced by other kinds of diversity, including racial and gender

differences--in other words, identity diversity. Identity diversity, therefore, can also produce bonuses. Drawing on research in economics, psychology, computer science, and many other fields, *The Diversity Bonus* also tells the stories of people and organizations that have tapped the power of diversity to solve complex problems. And the book includes a challenging response from Katherine Phillips of the Columbia Business School. The result changes the way we think about diversity in the workplace--and far beyond it.

Core Entrustable Professional Activities for Entering Residency Association of American Medical Colleges 2014-05-28 This landmark publication published by the AAMC identifies a list of integrated activities to be expected of all M.D. graduates making the transition from medical school to residency. This guide delineates 13 Entrustable Professional Activities (EPAs) that all entering residents should be expected to perform on day 1 of residency without direct supervision regardless of specialty choice. The Core EPAs for Entering Residency are designed to be a subset of all of the graduation requirements of a medical school. Individual schools may have additional mission-specific graduation requirements, and specialties may have specific EPAs that would be required after the student has made the specialty decision but before residency matriculation. The Core EPAs may also be foundational to an EPA for any practicing physician or for specialty-specific EPAs. Update: In August 2014, the AAMC selected ten institutions to join a five-year pilot to test the implementation of the Core Entrustable Professional Activities (EPAs) for Entering Residency. More than 70 institutions, representing over half of the medical schools accredited by the U.S. Liaison Committee on Medical Education (LCME), applied to join the pilot, demonstrating the significant energy and enthusiasm towards closing the gap between expectations and performance for residents on day one. The cohort reflects the breadth and diversity of the applicant pool, and the institutions selected are intended to complement each other through the unique qualities and skills that each team and institution brings to the pilot. **Faculty and Learners' Guide (69 pages) - Developing faculty:** The EPA descriptions, the expected behaviors, and the vignettes are expected to serve as the foundation for faculty development. Faculty can use this guide as a reference for both feedback and assessment in pre-clinical and clinical settings. **- Developing learners:** Learners can also use this document to understand the core of what is expected of them by the time they graduate. The EPA descriptions themselves delineate the expectations, while the developmental progression laid out from pre-entrustable to entrustable behaviors can serve as the roadmap for achieving them.

Pharm.D. to M.D. Nathan M Gartland PharmD 2021-07-29 Do you want to be a pharmacist? Do you want to be a Physician? Why not both? This book will take you step-by-step through applying, selecting, and interviewing for medical school all while showing you how to use your pharmacy background as leverage. Pharm.D. to M.D. invites its readers to take an inside look into the medical school application process and addresses how a pharmacy student or graduated pharmacist can make the transition into medicine. Applying to medical school can be a difficult and an isolating process for students who fall in-between these two challenging professions. My goal is to highlight the uniqueness of your professional pharmacy background and teach you how to use your advanced degree as an asset during the application cycle. Pharm.D. to M.D. uncovers the intricacies of generating a successful application while training applicants to avoid countless pitfalls along the way. This guide will serve as a compilation of resources that can be reviewed and utilized by pharmacy students at every professional grade level. If you have ever wondered if you have what it takes to get into medical school and wanted to look beyond your pharmacy degree, then this is the book for you! Written by a recently graduated pharmacist, and current allopathic medical student, Pharm.D. to M.D. offers perspective from experience and provides results that won't disappoint. Join me, along with many others, who have undertaken this difficult journey!

Longitudinal Integrated Clerkships Alliance for Clinical Education 2016-10-06 Dr. Poncelet and Dr. Hirsh eagerly developed an encyclopedic chapter for the 4th edition of the *Guidebook for Clerkship Directors*, and it seemed logical and proper to grow that chapter, which had been

truncated for the Guidebook, into this book. They have assembled the leading international experts in the field of the medical school longitudinal integrated curriculum, who in turn have generated what we are sure will be considered the ultimate resource for these experiences. This book fills a significant void in the medical education literature.

Accessibility, Inclusion, and Action in Medical Education Association of American Medical Colleges 2018-03-09 To capture the current state of disability in medical education, the AAMC and the University of California, San Francisco, School of Medicine partnered to publish a new report drawn from the lived experiences of learners with disabilities. This publication weaves together major themes from interviews with 47 students, residents, and physicians with disabilities to identify cultural and structural barriers and catalyze institutional policies that support all qualified learners, regardless of disability, throughout the medical education continuum. The report highlights key considerations that leaders in academic medicine can implement to increase meaningful access for learners with disabilities, including:

Diversity and Inclusion in Academic Medicine Association of American Medical Colleges 2016-03-07 The Liaison Committee on Medical Education (LCME) accreditation standards include specific language for medical education programs to have policies and practices, as well as programs and partnerships that will achieve the school's diversity and inclusion goals. This guide, produced by a multi-disciplinary team of experts, provides a roadmap that will not only help you to comply with important diversity standards, but also to pave the way for developing and sustaining a climate and culture of inclusion at your institution. This second edition includes the latest Supreme Court rulings on diversity and education, updated information on the LCME diversity elements, and updated sections in Part II. Also new for this edition is the online toolkit that accompanies the nine essential tasks (information to access the toolkit is found in the guide). The web-based toolkit aids diversity officers by providing directions, context, institutional examples, and resources for navigating the strategic planning process. Part 1 of the guide provides nine essential tasks as a roadmap for the process of diversity and inclusion strategic planning, plus offers key questions to help you think through each task. The online toolkit includes templates you can adapt for your institution and examples of current diversity strategic plans from medical schools around the country. Part 2 identifies specific strategies that could be included in a plan to meet diversity and inclusion goals, tips for working with leadership, and the skills and competencies needed to succeed as a diversity officer. With this guide plus the online toolkit, you will discover: Solid guidance on setting objectives, identifying tasks, and developing action steps Institutional examples and templates to guide each step of strategic planning process Tips to avoid missteps that could slow your progress Why diversity and inclusion should be included in strategic planning, including the case for excellence, accreditation, business and legality How to establish clear communication and decision-making channels with the key stakeholders Steps you can take in advance to avoid your diversity initiatives from becoming "siloes" How to achieve buy-in on the timeline for carrying out a diversity initiative And much more. This resource will help make the process of preparing a diversity and inclusion strategic plan more manageable and productive.

[Hey AdmissionsMom](#) Carolyn Allison Caplan 2019-03-15 Welcome to a no-nonsense, unconventional approach to college admissions! Hey AdmissionsMom: Real Talk from Reddit from the voices of r/ApplyingToCollege, with Carolyn Allison Caplan, aka u/admissionsmom FRONT DOOR COLLEGE ADMISSIONS HELP Discover what over 100,000 engaged r/ApplyingToCollege subscribers are learning about as they discuss a fresh approach to college admissions. With Hey AdmissionsMom, Carolyn and the kids from r/ApplyingToCollege give you a place to stop trying to figure out what your top schools want in you and instead ask yourself, What do I want out of life when I leave high school? What do I see for myself? You're a talented, interesting student, and when you really know who you are, you're going to make the best decisions for yourself As a sophomore or junior entering the college admissions process, maybe you're overwhelmed by the paperwork, school descriptions,

test score requirements, extracurricular activity options, and the daunting task of figuring it all out without losing yourself. Others of you already started the college admissions process and feel okay about your applications, but you're struggling with the personal statement or essays. Or, you want permission not to be a carbon copy of the ideal student and want out-of-the-box ways to be yourself, both in life and in the admissions process. And you're not just managing your expectations, but also your parents. College admissions can be especially intimidating if your high school sucks, you're first in your family to go to college, or you haven't always been a model student. You might also be a concerned parent or mentor looking for a guide designed not to stress you and your kid out and might even help with that as you learn the ropes of college admissions. For all the times you or your high school student thought, "There has to be a better way," when you hear advice about high-performance, achievement, and crazy amounts of EC's (extracurriculars)... You were right. You just found it. Hey AdmissionsMom: Real Talk from Reddit In this refreshingly honest, irreverent digest of college admissions questions and answers from u/admissionsmom and the subreddit, r/ApplyingToCollege, you'll find 37 bite-sized chapters of practical information, inspiring personal stories, insider tips, and yes, we have to be honest about this here - the occasional swear word, too. The time is NOW for you to: Focus on who you are, what you want from life, and how college fits into your goals, not the reverse Write essays and personal statements that actually sound like you, the real you Stop being one of 50,000 students applying to the same 20 colleges Stay positive even if you're not valedictorian or you didn't cure cancer (nobody else has either -- yet) Find questions asked by students just like you, so you don't feel alone or like you're the only one who doesn't already have it all figured out Take a deep breath as you learn about mindfulness By the end of Hey AdmissionsMom: Real Talk from Reddit, you will have peeled back the layers of your authentic self and be able to appreciate your personality traits, interests, and talents as you breathe and apply to college with a smile.

Succeeding in Academic Medicine John P. Sánchez 2020-01-14 This first-of-its-kind book for underrepresented racial and ethnic minorities (URM), women, and sexual and gender minorities in medicine offers the core knowledge and skills needed to achieve a well-planned, fulfilling career in academic medicine. The knowledge and skills provided by the esteemed co-authors, successful diverse pre-faculty, and junior and senior academicians, are complemented by their inspirational and motivational stories. Increasing diversity in the academic medicine workforce has been identified and embraced as a core value of institutional excellence at nearly all academic institutions and professional associations.

Despite this established core value, certain groups such as Black/African-American, Latino/Hispanic, American Indian/Alaska Native-identified individuals, women, and sexual and gender minorities, are still present in lower proportions compared with the general population and lack inclusion. In 12 chapters and with a unique focus on a practical approach to increasing diversity and inclusion in academic medicine, this book demystifies the often-insular world of academic medicine. It comprehensively outlines career opportunities and associated responsibilities, how to transform academic-related work to scholarship, and offers a clear and transparent look into the academic appointment and promotion process. By focusing on the practical steps described in this handy book, students and residents can develop a strong foundation for an academic medicine career and succeed in becoming the next generation of diverse faculty and administrators.

Aamc Data Book Association of American Medical Colleges 2016-04-07 Updated annually, the AAMC Data Book serves as a valuable resource of data and trends on U.S. medical schools and teaching hospitals. The 2016 edition is packed with 75 tables that provide data on the following 12 topics: accredited medical schools; applicants, students, and graduates; medical school faculty; medical school revenue; tuition, financial aid, and student debt; graduate medical education; teaching hospitals; health care financing; research expenditures; physicians; medical school faculty compensation; and price indices, federal expenditures, and debt. The Executive Summary highlights selected data findings. The AAMC Data Book can help to: Provide trend data that inform topics such as the attractiveness of medicine as a career and the diversity of applicants, matriculants, students, and graduates; Inform discussions about the potential impact of tuition, financial aid, and student debt on the recruitment of individuals into medicine and the career paths of these individuals after graduation; Describe the growth of U.S. medical schools; Gain perspective on changes in medical school revenues from various sources and categories; And much more. The data in this publication are derived from existing AAMC reports and databases, as well as external sources such as the National Institutes of Health and the American Medical Association.

The Impacts of Racism and Bias on Black People Pursuing Careers in Science, Engineering, and Medicine National Academies of Sciences, Engineering, and Medicine 2020-12-18 Despite the changing demographics of the nation and a growing appreciation for diversity and inclusion as drivers of excellence in science, engineering, and medicine, Black Americans are severely underrepresented in these fields. Racism and bias are significant reasons for this disparity, with detrimental implications on individuals, health care organizations, and the nation as a whole.

The Roundtable on Black Men and Black Women in Science, Engineering, and Medicine was launched at the National Academies of Sciences, Engineering, and Medicine in 2019 to identify key levers, drivers, and disruptors in government, industry, health care, and higher education where actions can have the most impact on increasing the participation of Black men and Black women in science, medicine, and engineering. On April 16, 2020, the Roundtable convened a workshop to explore the context for their work; to surface key issues and questions that the Roundtable should address in its initial phase; and to reach key stakeholders and constituents. This proceedings provides a record of the

workshop.

Medical School Admission Requirements (MSAR), 2012-2013 Aamc 2011 Completely rewritten for 2010, this year's edition of the guide features a more affable tone, new chapters, expanded data and information, and a color-infused format. In the Nation's Compelling Interest Institute of Medicine 2004-06-29 The United States is rapidly transforming into one of the most racially and ethnically diverse nations in the world. Groups commonly referred to as minorities-including Asian Americans, Pacific Islanders, African Americans, Hispanics, American Indians, and Alaska Natives-are the fastest growing segments of the population and emerging as the nation's majority. Despite the rapid growth of racial and ethnic minority groups, their representation among the nation's health professionals has grown only modestly in the past 25 years. This alarming disparity has prompted the recent creation of initiatives to increase diversity in health professions. In the Nation's Compelling Interest considers the benefits of greater racial and ethnic diversity, and identifies institutional and policy-level mechanisms to garner broad support among health professions leaders, community members, and other key stakeholders to implement these strategies. Assessing the potential benefits of greater racial and ethnic diversity among health professionals will improve the access to and quality of healthcare for all Americans.

Molecular Genetic Pathology Liang Cheng 2013-03-05 Molecular Genetic Pathology, Second Edition presents up-to-date material containing fundamental information relevant to the clinical practice of molecular genetic pathology. Fully updated in each area and expanded to include identification of new infectious agents (H1N1), new diagnostic biomarkers and biomarkers for targeted cancer therapy. This edition is also expanded to include the many new technologies that have become available in the past few years such as microarray (AmpliChip) and high throughput deep sequencing, which will certainly change the clinical practice of molecular genetic pathology. Part I examines the clinical aspects of molecular biology and technology, genomics, pharmacogenomics and proteomics, while Part II covers the clinically relevant information of medical genetics, hematology, transfusion medicine, oncology, and forensic pathology. Supplemented with many useful figures and presented in a helpful bullet-point format, Molecular Genetic Pathology, Second Edition provides a unique reference for practicing pathologists, oncologists, internists, and medical geneticists. Furthermore, a book with concise overview of the field and highlights of clinical applications will certainly help those trainees, including pathology residents, genetics residents, molecular pathology fellows, internists, hematology/oncology fellows, and medical technologists in preparing for their board examination/certification.

Almost Black Vijay Jojo Chokal-Ingam 2016-09-13 I got into medical school by saying I was black. I lied. Honestly, I am about as black as my sister Mindy Kaling (The Office / The Mindy Project). Once upon a time, I was an ethically challenged, hard-partying Indian American frat boy enjoying my third year of college. That is until I realized I didn't have the grades or scores to get into medical school. Legitimately. Still, I was determined to be a doctor and discovered that affirmative action provided a loophole that might help. The only problem? I wasn't a minority. So I became one. I shaved my head, trimmed my long Indian eyelashes, and applied as an African American. Not even my frat brothers recognized me. I joined the Organization of Black Students and used my middle name, Jojo. Vijay, the Indian American frat boy, became Jojo, the African American affirmative action applicant. Not everything went as planned. During a med school interview, an African American doctor angrily

confronted me for not being black. Cops harassed me. Store clerks accused me of shoplifting. Women were either scared of me or found my bald black dude look sexually mesmerizing. What started as a scam to get into med school turned into a twisted social experiment that taught me lessons I would never have learned in the classroom. I became a serious contender at some of America's greatest schools, including Harvard, Wash U, UPenn, Case Western, and Columbia. I interviewed at 11 schools while posing as a black man. After all that, I finally got accepted into medical school. Before I finished this book, I stirred a hornet's nest by telling my story. It has been featured in more than 100 media outlets, including CNN, NBC, TIME, FOX, and Huffington Post. Many loved it, but not everyone approved of what I did. My college classmate Tucker Max (I Hope They Serve Beer in Hell) disapproved. My sister Mindy Kaling furiously declared, "This book will bring shame on our family!" I disagree but I'll let you be the judge.

Understanding the Well-Being of LGBTQI+ Populations National Academies of Sciences, Engineering, and Medicine 2021-01-23 The increase in prevalence and visibility of sexually gender diverse (SGD) populations illuminates the need for greater understanding of the ways in which current laws, systems, and programs affect their well-being. Individuals who identify as lesbian, gay, bisexual, asexual, transgender, non-binary, queer, or intersex, as well as those who express same-sex or -gender attractions or behaviors, will have experiences across their life course that differ from those of cisgender and heterosexual individuals. Characteristics such as age, race and ethnicity, and geographic location intersect to play a distinct role in the challenges and opportunities SGD people face. Understanding the Well-Being of LGBTQI+ Populations reviews the available evidence and identifies future research needs related to the well-being of SGD populations across the life course. This report focuses on eight domains of well-being; the effects of various laws and the legal system on SGD populations; the effects of various public policies and structural stigma; community and civic engagement; families and social relationships; education, including school climate and level

of attainment; economic experiences (e.g., employment, compensation, and housing); physical and mental health; and health care access and gender-affirming interventions. The recommendations of Understanding the Well-Being of LGBTQI+ Populations aim to identify opportunities to advance understanding of how individuals experience sexuality and gender and how sexual orientation, gender identity, and intersex status affect SGD people over the life course.

The Premed Playbook Ryan Gray 2018-06-19 The Premed Playbook: Guide to the Medical School Personal Statement helps guide students in crafting their stories for the medical school Admission Committees. It's not only a collection of essays from students who got into top schools, but is a showcase of essays that started badly and were honed to tell great stories. Ryan Gray, MD shares the stories of students who likely didn't have a shot, but ultimately succeed, in part because of the advice laid out in The Premed Playbook: Guide to the Medical School Personal Statement. They had to fight their way into medical school—and told a great story to do it.

Adverse Impact James L. Outtz 2010-06-10 This text is the best single repository for a comprehensive examination of the scientific research and practical issues associated with adverse impact. Adverse impact occurs when there is a significant difference in organizational outcomes to the disadvantage of one or more groups defined on the basis of demographic characteristics such as race, ethnicity, gender, age, religion, etc. This book shows, based on scientific research, how to design selection systems that minimize subgroup differences. The primary object of this volume in the SIOP series is to bring together renowned experts in this field to present their viewpoints and perspectives on what underlies adverse impact, where we are in terms of assessing it and what we may have learned (or not learned) about minimizing it.
