Cat's Eye Margaret Atwood 2011-06-08 From the #1 New York Times bestselling author of *The Handmaid's Tale* *Cat's Eye* is the story of Elaine Risley, a controversial painter who returns to Toronto, the city of her youth, for a retrospective of her art. Engulfed by vivid images of the past, she reminisces about a trio of girls who initiated her into the fierce politics of childhood and its secret world of friendship, longing, and betrayal. Elaine must come to terms with her own identity as a daughter, a lover, an artist, and a woman—but above all she must seek release from her haunting memories. Disturbing, humorous, and compassionate—and a finalist for the Booker Prize—*Cat's Eye* is a breathtaking novel of a woman grappling with the tangled knot of her life.

The NexStar Evolution and SkyPortal User's Guide James L. Chen 2016-05-26 This book serves as a comprehensive guide for using a Nexstar Evolution mount with WiFi SkyPortal control, walking the reader through the process for aligning and operating the system from a tablet or smartphone. The next generation Go-To mount from Celestron, this is compatible not only with the Nextstar Evolution but also with older mounts. It is the ideal resource for anyone who owns, or is thinking of owning, a Nexstar Evolution telescope, or adapting their existing Celestron mount. Pros and cons of the system are thoroughly covered with a critical depth that addresses any possible question by users. Beginning with a brief history of Go-To telescopes and the genesis of this still new technology, the author covers every aspect of the newly expanding capability in observing. This includes the associated Sky Portal smartphone and tablet application, the transition from the original Nexstar GoTo system to the new SkyPortal system, the use of the Sky Portal application with its Sky Safari 4 basic software and Celestron WiFi adaptations, and discussions on the use of SkyPortal application using the Celestron adapter on older Celestron mounts. Comments and recommendations for equipment enable the reader to successfully use and appreciate the new WiFi capability without becoming overwhelmed. Extensively illustrated using actual screenshots from the program interface, this is the only guide to the Nextstar SkyPortal an observer will need.

A Buyer's and User's Guide to Astronomical Telescopes & Binoculars James Mullaney 2007-05-26 Both beginning/novice amateur astronomers (at the level of *Astronomy* and *Night Sky* magazine readers), as well as more advanced amateur astronomers (level of *Sky* and *Telescope*) will find this book invaluable and fascinating. It includes detailed up-to-date information on sources, selection and use of virtually every major type, brand and model of such instruments on today's market. The book also includes details on the latest released telescope lines, e.g. the 10-, 12-, 14- and 16-inch aperture models of the Meade LX-R series. As a former editor for *Sky & Telescope*, *Astronomy*, and *Star & Sky* magazines, the author is the ideal person to write this book.

Cat's Eye William W. Johnstone 2016-10-25 SCRATCH. PURR. Night after night the soft cat noises drifted through the isolated A-frame where bestselling author Dee Conner retreated to write her romances. Was it another harmless prank pulled by one of her fans? Or was it something much more sinister . . . and deadly . . . ? SCRATCH. PURR. Carl Garrett, the fourth bodyguard hired to protect Dee, recognized the sounds for what they were. Demon sounds. Garrett was one of the few survivors of the hushed-up events in Ruger County. But the Lord of Darkness would not make the same mistake twice. The battle was only just beginning—a battle of nerves as well as strength that would pit one man against the most terrifying evil of all . . .

The Cheshire Cat's Eye Marcia Muller 2011-10-01 To tourists, bay-windowed Victorian mansions are quaint, peaceful symbols of old San Francisco, but on the secluded hill above Steiner Street, the gingerbread has sparked a bitter battle. Ambitious developers are pushing for restoration, and residents are fighting for their homes—until a controversial restorationist is found dead on the job, awash in garish house paint. Private investigator Sharon McCone is called in only to discover a second bitter feud, this time between the developers and members of the city's powerful architectural community. As workmen rip through layers of drywall plaster, and wallpaper, McCone unearths an older crime: a cache of stolen antiques comes to light, and a missing one-of-a-kind Tiffany lamp emblazoned with the glowing profile of the Cheshire Cat becomes McCone's most important clue. To catch a killer, she must follow its eerie, knowing grin before its hidden eye foresees a fatal future.

Cat's Eye Gemma Herrero Virto 2018-11-01 Dark forests, paranormal phenomena, a crime spree that shocks a small town and a stone that lets you connect to the other side. Are you brave enough to enter Erkiaga? Laura Ugalde, a young anthropology professor, decides to leave her old life behind and move to the town of Erkiaga to do the facial reconstruction of an unknown female, murdered 15 years ago. However, a series of strange events start to occur as soon as she arrives: episodes of sleepwalking where she destroys the previous day's work, paranormal phenomena, threats of what will happen if she doesn't abandon the case. In spite of all this, Laura decides to continue her work, but several men from the town begin to show up dead; murdered as she works on the reconstruction process. Is she committing these heinous crimes in her sleep? Is the dead girl's spirit gaining enough strength to enact her vengeance thanks to her reconstruction work? Or is there someone so interested in not having the crime solved that they're systematically eliminating all of the witnesses?

The Vixen Star Book User Guide James Chen 2015-10-01 This book is for anyone who owns, or is thinking of owning, a Vixen Star Book Ten telescope mount or its predecessor. A revolution in amateur astronomy has occurred in the past decade with the wide availability of high tech, computer-driven, Go-To telescopes. Vixen Optics is leading the way by offering the Star Book Ten system, with its unique star map graphics software. The Star Book Ten is the latest version of computer telescope control using star map graphics as a user interface, first introduced in the original Star Book first offered in 2003. The increasingly complicated nature of this software means that learning to optimize this program is not straightforward, and yet the resulting views when all features are correctly deployed can be phenomenal. After a short history of computerized Go-To telescopes for the consumer amateur astronomer market,

Chen offers a treasury of technical information. His advice, tips, and solutions aid the user in getting the most out of the Star Book Ten system in observing sessions.

Hereditary Hearing Loss and Its Syndromes Robert J. Gorlin 1995 This definitive reference work replaces Konigsmark and Gorlin's *Genetic and Metabolic Deafness* (1976). Whereas the earlier volume covered 151 genetic conditions related to hearing loss, this work covers 435. As before, the authors first discuss isolated hereditary hearing loss and then present hearing loss syndromes such as those involving the nervous system, eye, external ear and musculoskeletal system. The discussions are authoritative, practical and well-illustrated, and those of the most important syndromes are very detailed. Introductory chapters deal with the history of the field, clinical approach, embryology of the ear, tooth anomalies and hearing loss, and related endocrine and metabolic disorders. Throughout, the authors pay careful attention to nomenclature and classification. This will be an invaluable resource for all professionals concerned with genetic hearing loss, including medical geneticists, audiologists and otolaryngologists.

The Digital Signal Processing Handbook - 3 Volume Set Vijay K. Madisetti 2018-10-08 Now available in a three-volume set, this updated and expanded edition of the bestselling *Digital Signal Processing Handbook* continues to provide the engineering community with authoritative coverage of the fundamental and specialized aspects of information-bearing signals in digital form. Encompassing essential background material, technical details, standards, and software, *The Digital Signal Processing Handbook, Second Edition* reflects cutting-edge information on signal processing algorithms and protocols related to speech, audio, multimedia, and video processing technology associated with standards ranging from WiMax to MP3 audio, low-power/high-performance DSPs, color image processing, and chips on video. The three-volume set draws on the experience of leading engineers, researchers, and scholars and includes 29 new chapters that address multimedia and Internet technologies, tomography, radar systems, architecture, standards, and future applications in speech, acoustics, video, radar, and telecommunications. Each volume in the set is also available individually ...

Emphasizing theoretical concepts, *Digital Signal Processing Fundamentals* (Catalog no. 46063) provides comprehensive coverage of the basic foundations of DSP. Coverage includes: Signals and Systems, Signal Representation and Quantization, Fourier Transforms, Digital Filtering, Statistical Signal Processing, Adaptive Filtering, Inverse Problems and Signal Reconstruction, and Time–Frequency and Multirate Signal Processing. *Wireless, Networking, Radar, Sensor Array Processing, and Nonlinear Signal Processing* (Catalog no. 46047) thoroughly covers the foundations of signal processing related to wireless, radar, space–time coding, and mobile communications together with associated applications to networking, storage, and communications. *Video, Speech, and Audio Signal Processing and Associated Standards*, (Catalog no. 4608X) details the basic foundations of speech, audio, image, and video processing and associated applications to broadcast, storage, search and retrieval, and communications.

A Cat's Eye View of the World - Theology According to Puderd Craig Childress Johnson 2017-02-24 In the Old Testament, God used Balaam's donkey to speak to him and protect him from great difficulty. I think in the Atomic Age God has used a small cat to speak to me many times. I don't hear a voice like Balaam, but the messages are just as loud. In a complex age fraught with distractions and dangers, we are in need of reminders of those times when we are about to stray into the abyss. I hear Puderd telling me spiritual life is found in simplicity and knowledge of God is found in quietness. Contentment is found in good friends, not good products. Trust and safety are really beyond our control and we can only have these if we trust in the One who is in control. Cat's Eye Grace O'Connell 2011 *Insight Study Guides* are written by experts and cover a range of popular literature, plays and films. A Buyer's and User's Guide to Astronomical Telescopes and Binoculars James Mullaney 2013-10-10 Amateur astronomers of all skill levels are always contemplating their next telescope, and this book points the way to the most suitable instruments. Similarly, those who are buying their first telescopes – and these days not necessarily a low-cost one – will be able to compare and contrast different types and manufacturers. This exciting and revised new guide provides an extensive overview of binoculars and telescopes. It includes detailed up-to-date information on sources, selection and use of virtually every major type, brand, and model on today's market, a truly invaluable treasure-trove of information and helpful advice for all amateur astronomers. Originally written in 2006, much of the first edition is inevitably now out of date, as equipment advances and manufacturers come and go. This second edition not only updates all the existing sections of "A Buyer's and User's Guide to Astronomical Telescopes and Binoculars" but adds two new ones: Astro-imaging and Professional-Amateur collaboration. Thanks to the rapid and amazing developments that have been made in digital cameras – not those specialist cool-chip astronomical cameras, not even DSLRs, but regular general-purpose vacation cameras – it is easily possible to image all sorts of astronomical objects and fields. Technical developments, including the Internet, have also made it possible for amateur astronomers to make a real contribution to science by working with professionals. Selecting the right device for a variety of purposes can be an overwhelming task in a market crowded with observing options, but this comprehensive guide clarifies the process. Anyone planning to purchase binoculars or telescopes for astronomy – whether as a first instrument or as an upgrade to the next level – will find this book a treasure-trove of information and advice. It also supplies the reader with many useful hints and tips on using astronomical telescopes or binoculars to get the best possible results from your purchase.

The Cat's Eye Shell: The Chain of Charms 4 Kate Forsyth 2007-11-10 The fourth exciting book in the six-book series by bestselling author, Kate Forsyth. Once there was a gypsy queen who wore on her wrist a chain of six lucky charms – a golden crown, a silver horse, a butterfly caught in amber, a cat's eye shell, a bolt of lightning forged from the heart of a falling star, and the flower of the rue plant, herb of grace. The queen gave each of her six children one of the charms as their lucky talisman, but ever since the chain of charms was broken, the gypsies had been dogged with misfortune. The Cat's Eye Shell – Book 4, 20-24th August 1658 Having acquired the first three charms in the quest to secure their family's freedom, Luka and Emilia flee into Sussex with soldiers hot on their heels, in company with a Royalist duke, a Catholic priest, a highwayman and young Tom Whitehorse. Only the Catholic underground can help them all escape – but this is a most dangerous religion in the time of Puritan rule. And Emilia and Luka still must find the elusive gypsy tribe of the cat's eye shell, who, it seems, have turned to smuggling...

Gothic Glimpses in Margaret Atwood's "Cat's Eye" Or Representations of Art and Media and Mysterious Twin Ship Maria Blau 2007-12 Seminar paper from the year 2005 in the subject American Studies - Literature, grade: 2.0, University of Constance (Institut für Anglistik und Amerikanistik), course: Seminar: The Nature-Culture Paradigm in Canadian Literature, 17 entries in the bibliography, language: English, abstract: Margaret Atwood's Cat's Eye is a novel that certainly covers plenty of discourses and touches several genres. At the head of all it can well be considered to be a bildungs- or kunstlerroman in the guise of the fictive autobiography. Many critics have pointed out that it is one of Atwood most personal novels, a piece that undoubtedly turns "the tables on their own kind"¹, that has many autobiographical features. But that will not be the concern in my following reflections which will rather deal with the gothic elements of the novel. My readers may argue that it is rather Atwood's Robber Bride, The Blind Assassin and Alias Grace that are obliged to the gothic theme.² But it is actually Cat's Eye that offers the vast range of gothic elements that correspond to each other and to the various levels of representation the novel offers. I regard it as necessary to deliver a short definition of the gothic novel in the first place. However, I want to point out that I do not see Cat's Eye just in the dark illumination of the gothic. I rather pick up and explain different gothic gatherings and "gothic games" Atwood plays with the reader than devote my analysis to the issue completely.
