Pacific Standoff (Periscope #1) Richard Deming 2015-03-31 After the horror of Pearl Harbor, American forces in the Pacific had a long way to come back. With the nucleus of their battleship and carrier fleet destroyed, they had to rely on the much-scorned submarines of the Silent Service. Jack McCrary, like his comrades in the submarine service, was determined not to let them down. In his battered "pig boat," the 'Manta,' he led an ocean-wide attack on Japanese freighters and battleships that held the vaunted Imperial Navy to a standstill. Back home, the McCrary clan, an all-Navy family, had its own problems. Helen, the free-loving sister, was sometimes a boost, but more often a menace to wartime morale. And Dad, the Admiral, was slipping fast toward dying. And Jack McCrary, who with his dauntless crew had been the scourge of the Marshalls and the South China Sea, suddenly appeared to be losing his grip, as something unseen attacked his mind and body...

Herodotus and the Question Why Christopher Pelling 2019-07-15 In the 5th century BCE, Herodotus wrote the first known history to break from the tradition of Homeric storytelling, basing his text on empirical observations and arranging them systematically. Herodotus and the Question Why offers a comprehensive examination of the methods behind the Histories and the challenge of documenting human experiences, from the Persian Wars to cultural traditions. In lively, accessible prose, Christopher Pelling explores such elements as reconstructing the mentalities of storyteller and audience alike; distinctions between the human and the divine; and the evolving concepts of freedom, democracy, and individualism. Pelling traces the similarities between Herodotus's approach to physical phenomena (Why does the Nile flood?) and landmark events (Why did Xerxes invade Greece? And why did the Greeks win?), delivering a fascinating look at the explanatory process itself. The cultural forces that shaped Herodotus's thinking left a lasting legacy for us, making Herodotus and the Question Why especially relevant as we try to record and narrate the stories of our time and to fully understand them.

Critique and Praxis Bernard E. Harcourt 2020-08-11 Critical philosophy has always challenged the division between theory and practice. At its best, it aims to turn contemplation into emancipation, seeking to transform society in pursuit of equality, autonomy, and human flourishing. Yet today's critical theory often seems to engage only in critique. These times of crisis demand more. Bernard E. Harcourt challenges us to move beyond decades of philosophical detours and to harness critical thought to the need for action. In a time of increasing awareness of economic and social inequality, Harcourt calls on us to make society more equal and just. Only critical theory can guide us toward a more self-reflexive pursuit of justice. Charting a vision for political action and social transformation, Harcourt argues that instead of posing the question, "What is to be done?" we must now turn it back onto ourselves and ask, and answer, "What more am I to do?" Critique and Praxis advocates for a new path forward that constantly challenges each and every one of us to ask what more we can do to realize a society based on equality and justice. Joining his decades of activism, social-justice litigation, and political engagement with his years of critical theory and philosophical work, Harcourt has written a magnum opus.

Another Year Finds Me in Texas Vicki Adams Tongate 2016-02-23 Lucy Pier Stevens, a twenty-one-year-old woman from Ohio, began a visit to her aunt's family near Bellville, Texas, on Christmas Day, 1859. Little did she know how drastically her life would change on April 4, 1861, when the outbreak of the Civil War made returning home impossible. Stranded in enemy territory for the duration of the war, how would she reconcile her Northern upbringing with the Southern sentiments surrounding her? Lucy Stevens's diary—one of few women's diaries from Civil War-era Texas and the only one written by a Northerner—offers a unique perspective on daily life at the fringes of America's bloodiest conflict. An articulate, educated, and keen observer, Stevens took note of seemingly everything—the weather, illnesses, food shortages, parties, church attendance, chores, schools, childbirth, death, the family's slaves, and political and military news. As she confided her private thoughts to her journal, she unwittingly revealed how her love for her Texas family and the Confederate soldier boys she came to care for blurred her loyalties, even as she continued to long for her home in Ohio. Showing how the ties of heritage, kinship, friendship, and community transcended the sharpest division in US history, this rare diary and Vicki Adams Tongate's insightful historical commentary on it provide a trove of information on women's history, Texas history, and Civil War history.

Ocean Circulation and Climate Swadhin Behera 2013-10-22 The tropical oceans play important roles in the global climate system through ocean transports of heat and freshwater as well as ocean-atmosphere interactions. The developments in observational networks during recent decades have helped us to quantify the strength and variability of most of the ocean general circulations responsible for the transports. Those are discussed in detail in individual sections covering each tropical basin separately with a special emphasis on recent research results. Shallow overturning cells observed in all three tropical basins as well as the deep Atlantic meridional overturning circulation are such examples that are linked to ocean and climate variations on multiple timescales. In addition, tropical ocean-atmosphere interactions associated with oceanic planetary waves cause large-scale climate variations such as El Niño/Southern Oscillation (ENSO), Indian Ocean Dipole, Atlantic Niño, and ENSO Modoki. Recent advances in numerical modeling augmented by in situ and satellite observations are helping the research community to understand ocean process and to predict associated climate variations on seasonal to longer timescales.

The Golden Frontier Herman Francis Reinhart 1962-01-01 The gold rush was Herman Francis Reinhart's life for

almost twenty years. From the summer of 1851 when, as a boy in his late teens, he traveled the Oregon trail to California, until a January day in 1869 when he climbed aboard an eastbound train at Evanston, Wyoming, he was a part of every gold discovery that stirred the West. Reinhart dipped his pan in the streams of northern California and western Oregon—in Humbug Creek, Indian Creek, Rogue River, and Sucker Creek. He made the arduous and dangerous overland journey through Indian-occupied western Washington and British Columbia to find the Fraser River gold even more elusive than that farther south. With his teams and wagons he traversed all of the inland mine areas from Walla Walla to Fort Benton, from Boise Basin to South Pass City. Reinhart's German common sense soon turned him from actual mining to other sources of income, but whatever his labor was, the mines were always the focal point of his activities. When he operated a bakery and saloon it was a business whose customers were miners, whose transactions were more likely to involve gold dust than legal tender, and whose gambling tables saw the exchange of mining fortunes. When he operated a whipsaw mill the timbers cut there were used by miners for sluices and cradles. For a while Reinhart farmed, but planting and harvesting suffered from interruption by frequent expeditions to the mines. And when he prospered as a teamster it was to and from the mining towns that he hauled passengers, supplies, and equipment. The men who, like Herman Francis Reinhart, hopefully followed the golden frontier were not an articulate group, and the written records of their lives are few and fragmentary. But Reinhart, in his later years, recorded his experiences in five long, narrow, hardback ledgers. Many years after he died his daughter gave the ledgers to a friend in Chanute, Kansas—Nora Cunningham—who read the narrative, became fascinated by it, and typed it for publication. Reinhart's account, written in a grammar and language all his own, is not a record of the historian's West, but of the West of the individual miner. The pages are filled with the details of day-to-day life of the miners—the subjects that interested them, the problems that plagued them, their fun and feuding, their frustrations and hopes. Edited by an authority of the history of the West, it is a book that will offer exciting reading to casual readers and scholars alike.

The Pacific Room Michael Fitzgerald 2017-07-01 'A wonderfully stylistic novel, dream-like and mesmeric. It moves with ekphrastic cadences, from painting to writing and back again, between the present and the past, both muted and full of nuance, like a water-colour of archived time. Fitzgerald skilfully employs a controlled language of concealment and careful observation through which character is translated. All the while, there are subliminal disturbances below, indicating fatal and fateful meetings between culture and history.' --Brian Castro, Winner of the Patrick White Award for Literature This remarkable debut novel tells of the last days of Tusitala, 'the teller of tales', as Robert Louis Stevenson became known in Samoa where he chose to die. In 1892 Girolamo Nerli travels from Sydney by steamer to Apia, with the intention of capturing something of Jekyll and Hyde in his portrait of the famous author. Nerli's presence sets in train a disturbing sequence of events. More than a century later, art historian Lewis Wakefield comes to Samoa to research the painting of Tusitala's portrait by the long-forgotten Italian artist. On hiatus from his bipolar medication, Lewis is freed to confront the powerful reality of all the desires and demons that R. L. Stevenson couldn't control. Lewis's personal journey is shadowed by the story of the lovable Teuila, a so-called fa'afafine ('in the manner of a woman'), and the spirit of Stevenson's servant boy, Sosimo. Set in an evocative tropical landscape haunted by the lives and spirits which drift across it, *The Pacific Room* is both a love letter to Samoa and a lush and tender exploration of artistic creation, of secret passions and merging dualities.

Asian Pacific American Politics Andrew Aoki 2020-06-29 *Asian Pacific American Politics* presents some of the most recent research on Asian American politics, including both quantitative and qualitative examinations of the role of Asian and Pacific Islander Americans in some of today's major political controversies. In the highly polarized politics of the United States in the early 21st century, non-Black racial minorities such as Asian Americans and Pacific Islander Americans will increasingly find themselves swept into the epicenter of many of the divisive controversies. This timely volume presents the latest scholarly research on some of these issues, examining questions such as Asian American support for #Black Lives Matter, responses to racially-charged attacks, and the differences in the political socialization, politicization, and community-based activism within and across sectors of the Asian American population. In addition to examining political identity, voting participation, political mobilization, transnational politics, and partisan formation, the volume also investigates important, but little discussed, issues such as the Native Hawaiian sovereignty movement, political incorporation of Filipino Americans, and the struggle to establish "comfort women" memorials in the United States. Contributors also examine, through dialogues, how Asian Americans fit into

the larger world of American racial politics, the extent to which they are likely to build coalitions with other communities of color, and the boundaries and contours of Asian American political theory. Exploring and Expanding the Political World Pioneered by Don T. Nakanishi, Asian Pacific American Politics will be of great interest to scholars of race and ethnicity in American politics, immigration and minority incorporation, ethnic identity politics, and political participation and democratic inclusion of Asians. The chapters were originally published in Politics, Groups, and Identities.

City of Workers, City of Struggle Joshua B. Freeman 2019-04-30 From the founding of New Amsterdam until today, working people have helped create and re-create the City of New York through their struggles. Starting with artisans and slaves in colonial New York and ranging all the way to twenty-first-century gig-economy workers, this book tells the story of New York's labor history anew. City of Workers, City of Struggle brings together essays by leading historians of New York and a wealth of illustrations, offering rich descriptions of work, daily life, and political struggle. It recounts how workers have developed formal and informal groups not only to advance their own interests but also to pursue a vision of what the city should be like and whom it should be for. The book goes beyond the largely white, male wage workers in mainstream labor organizations who have dominated the history of labor movements to look at enslaved people, indentured servants, domestic workers, sex workers, day laborers, and others who have had to fight not only their masters and employers but also labor groups that often excluded them. Through their stories—how they fought for inclusion or developed their own ways to advance—it recenters labor history for contemporary struggles. City of Workers, City of Struggle offers the definitive account of the four-hundred-year history of efforts by New York workers to improve their lives and their communities. In association with the exhibition City of Workers, City of Struggle: How Labor Movements Changed New York at the Museum of the City of New York

Donald Seldin Raymond S. Greenberg 2020-09-10 No one would have blamed Donald Seldin for running away. When he arrived at Southwestern Medical College in 1951, it was a collection of hastily repurposed military shacks creaking in the wind. On practically day one he became chair of the department of medicine—when the only other full-time professors departed. By the time he stepped down thirty-six years later, Seldin had transformed a sleepy medical college into the University of Texas Southwestern Medical Center—a powerhouse of research and patient care and an anchor of the city of Dallas. Raymond Greenberg, a physician-scholar, tells Seldin's story of perseverance and intellectual triumph. Drawing on interviews with Seldin's trainees and colleagues—and on Seldin's own words—Greenberg chronicles the life of the Brooklyn boy who became one of Texas's foremost citizens and taught decades of men and women to heal. A pioneering nephrologist, Seldin devoted his career to developing the specialty; educating students, residents, and fellows; caring for patients; and nurturing basic research. Seldin was a wildcatter in the best sense. He declined the comfortable prestige of Harvard and Yale and instead embraced a worthy challenge with an unflagging sense of mission. Graceful and richly detailed, *The Maestro of Medicine* captures an inspiring life of achievement and service.

Trans-Pacific Mobilities Lloyd L. Wong 2017-03-01 With the number of Chinese living outside of its borders expected to reach 52 million by 2030, China has one of the most mobile populations on earth, shaping economies, cultures, and politics around the globe. Trans-Pacific Mobilities charts how the cross-border movement of Chinese people, goods, and images affects notions of place, belonging, and identity, particularly in Canada. Drawing on the

new mobilities paradigm, contributors explore this phenomenon through five lenses, mapping out historic, cultural and symbolic, highly skilled, family and gendered, and transnational mobilities. This volume offers fresh insights into historical and contemporary Chinese mobilities and issues of transnationalism.

Let the People In Jan Reid 2012-10-03 This intimate biography of the pioneering Texas governor is “required reading for political junkies—and for women considering a life in politics” (Booklist). When Ann Richards delivered the keynote of the 1988 Democratic National Convention and mocked President Bush—“Poor George, he can’t help it. He was born with a silver foot in his mouth”—she became an instant celebrity and triggered a rivalry that would alter the course of history. In 1990, she won the governorship of Texas, becoming the first ardent feminist elected to high office in America. Richards opened pathways for greater diversity in public service, and her achievements created a legacy that transcends her tenure in office. In Let the People In, Jan Reid offers an intimate portrait of Ann Richards’s remarkable rise to power as a liberal Democrat in a deeply conservative state. Reid draws on his long friendship with Richards, as well as interviews with family, personal correspondence, and extensive research to tell the story of Richards’s life, from her youth in Waco, through marriage and motherhood, her struggle with alcoholism, and her shocking encounters with Lyndon Johnson and Jimmy Carter. Reid shares the inside story of Richards’s rise from county office to the governorship, as well as her score-settling loss of the governorship to George W. Bush. Reid also describes Richards’s final years as a mentor to a new generation of public servants, including Hillary Clinton.

Econometric Models of Asian-Pacific Countries Shinichi Ichimura 2012-12-06 This book is a sequel to our first report of ASIAN LINK PROJECT in 1985: Econometric Models of Asian LINK, Springer-Verlag, Tokyo - Berlin - New York. Now the scope is expanded to Asian-Pacific Countries in coverage, so that this monograph presents the econometric models of Japan, the United States, Canada, China, Korea, Taiwan, Hong Kong, Thailand, the Philippines, Malaysia, Singapore, Indonesia, Australia and the European Community. We are particularly happy to have included the excellent models of Australia and Canada whose economies are essential parts of the Asian-Pacific Economic Community. Most of those models were presented at the Workshop of Asian Link Project held in Bandung, Indonesia at the time of the Second Convention of the East Asian Economic Association, 1990. Those models have been up-dated since then, and several other important models were added. Unlike our previous book, we have not tried here to link these national models as a regional or global model in any way, except for the model by S. Kinoshita which offers a regional linkage for Pacific-basin economies by linking the US, Japan, Canada, the European Community countries as a group, Asian NIEs (Korea, Hong Kong, Taiwan), ASEAN (Indonesia, Malaysia, the Philippines, Singapore) and East Asian economies. As we argued in our previous publication, we tried to publish these econometric models again with the statistical data as much as we could, so as to enable the reader examine the estimation and performance of the models by himself.

American Empire in the Pacific Arthur Power Dudden 2022-01-27 American Empire in the Pacific explores the empire that emerged from the Oregon Treaty of 1846 with Great Britain and the outcome of the Mexican War in 1848. Together, they signalled the mastery of the United States over the continent of North America; the Pacific Ocean and the ancient civilizations of Asia at last lay within reach. England's East India Company in the 17th and 18th centuries had introduced Asian wares including tea to the American colonists, but wars against France and then the struggle for American independence held back expansion by Yankee entrepreneurs until 1783. Thereafter, from the Atlantic seaboard, American ships began regularly to reach China. Merchants, sailors and missionaries, motivated toward trade and redemption like the Europeans they met along the way, encountered the exotic peoples and cultures of the Pacific. Would-be empire builders projected a manifest destiny without limits. Russian Alaska, the native kingdom of Hawai'i, Japan, Korea, Samoa, and Spain's Philippine Islands, as well as a transcontinental railroad and an isthmian canal, acquired strategic significance in American minds, in time to outweigh both commerce and conversion.

The Pacific Basin Shane J. Barter 2017-05-12 The Pacific Basin: An Introduction is a new textbook which provides an interdisciplinary and comparative overview of the emerging Pacific world. Interest in the Pacific Basin has increased markedly in recent years, driven largely by the rise of China as a global rival to the United States and Asian development more generally. Growth in eastern Asia, as well as in the western Americas, has led the Pacific Basin to evolve as a dynamic economic zone. To make sense of this transformation, the book: Defines the Pacific

Basin, locates it in academic research, and explains its importance. Addresses the historical origins and evolution of the Pacific Basin and its sub-regions. Introduces students to the historical and contemporary relationships, continuities and differences that characterize the region. Incorporates analyses of colonialism and imperialism, migration and settlement, economic development and trade, international relations, war and memory, environmental policy, urbanization, mental and public health, gender, film, and literature. Air Power in the Indian Ocean and the Western Pacific Howard M. Hensel 2020-07-17 This book examines the security dynamics of the Indian Ocean and the Western Pacific, concentrating upon an analysis and evaluation of the air power capabilities of the various powers active in the two regions. The volume is designed to help improve understanding of the heritage and contemporary challenges confronting the global community in the Indian Ocean and the Western Pacific, as well as to illuminate the policies of the various powers involved in the affairs of these regions, and the military capabilities that are available in support of those policies. The 16 individual chapters examine both the traditional and the non-traditional threats that confront the various Indian Ocean and Western Pacific powers, and assess the roles played by land-based and naval, fixed-wing and rotary-wing, manned and unmanned aircraft, as well as by offensively and defensively capable ballistic and cruise missiles in addressing these challenges. In doing so, the various chapters analyze and evaluate the air power doctrine, capabilities, deployment patterns, and missions of the respective states. In addition, they assess the future issues, challenges, and responses involving air power as it, acting in concert with other military instruments, seeks to contribute to securing and promoting the interests of the state. This book will be of much interest to students of air power, strategic studies, Asian and Middle Eastern politics, and International Relations.

Trans-Pacific Partnership Agreement Abhijit Das 2017-11-27 Despite the United States withdrawing from the Trans-Pacific Partnership (TPP) Agreement, its template of rules remains highly relevant for future negotiations on international trade. This book helps to evaluate the legal provisions of this pact, its background and its possible evolutionary path. There is a view in the policy discourse that India should actively embrace the norms contained in the Agreement. *Trans-Pacific Partnership Agreement: A Framework for Future Trade Rules?* offers a balanced and objective analysis of the likely impact of the TPP template of rules on developing countries such as India and significantly contributes to the ongoing debate regarding India's ideal stance. This book will be useful for policymakers, trade lawyers, policy analysts, academics, economists and government officials, especially those from developing countries.

Asia-Pacific in the New World Order Christopher Brook 2013-11-05 Asia-Pacific in the New World Order critically explores the notion that a distinctive regional power bloc is developing linking countries bordering the Pacific, with East Asia at its core. This student-friendly volume sheds light on the complex interplay between global, regional and national forces which have transformed the Asia-Pacific area into one of the most vibrant and economically successful regions in the world. Historical narratives alongside geopolitical and geoeconomic perspectives are deployed to examine the shifting pattern of power relations and security structures across the region, set within a wider world context. Key issues addressed include: * what are the primary security problems of the region and how are they being resolved? * does the dynamic growth of the region, and particularly the rise of China, pose a challenge to existing structures of world order? The text has a strong interdisciplinary flavour drawing on analytical approaches from the international relations, political economy and political geography literature. Authors have been drawn from the Asia-Pacific region and the UK and all are established scholars in their specialist fields.
