The Wars of Gods and Men Zecharia Sitchin 1992-06-01 The Earth Chronicles series, in six volumes, deals with the history and prehistory of Earth and humankind. Each book in the series, based upon information written on clay tablets by the ancient civilizations of the Near East, records the fantastic and real battles that occurred between the original creator gods over control of planet Earth. Asserting the premise that mythology is not fanciful but the repository of ancient memories, The Earth Chronicles series suggests that the Bible ought to be read literally as a historic/scientific document, and that ancient civilizations--older and greater than assumed--were the product of knowledge brought to Earth by the Anunnaki, "Those Who from Heaven to Earth Came." The 12th Planet, the first book of the series, presents ancient evidence for the existence of an additional planet in the Solar System: the home planet of the Anunnaki. In confirmation of this evidence, recent data from unmanned spacecraft has led astronomers to actively search for what is being called "Planet X." The subsequent volume, The Stairway to Heaven, traces man's unending search for immortality to a spaceport in the Sinai Peninsula and to the Giza pyramids, which had served as landing beacons for it--refuting the notion that these pyramids were built by human pharaohs. Recently, records by an eye-witness to a forgery of an inscription by the pharaoh Khufu inside the Great Pyramid corroborated the book's conclusions. In The Wars of Gods and Men, the third volume of his series, Zacharia Sitchin recounts events closer to our times, concluding that the Sinai spaceport was destroyed 4,000 years ago with nuclear weapons. Photographs of Earth from space clearly show evidence of such an explosion. The Wars of Gods and Men additionally embraces Canaanite, Hittite, and Hindu sources to include in these investigations the incidents of The Great Flood, the Tower of Babel, and the upheaval of Sodom and Gomorrah. Sitchin's unique reexamination of ancient mysteries explains these past cataclysmic events in the history of humanity, opening insights into our future.

The Synthesizer Mark Vail 2014-01-22 Electronic music instruments weren't called synthesizers until the 1950s, but their lineage began in 1919 with Russian inventor Lev Sergeyevich Termen's development of the Etherphone, now known as the Theremin. From that point, synthesizers have undergone a remarkable evolution from prohibitively large mid-century models confined to university laboratories to the development of musical synthesis software that runs on tablet computers and portable media devices. Throughout its history, the synthesizer has always been at the forefront of technology for the arts. In *The Synthesizer: A Comprehensive Guide to Understanding, Programming, Playing, and Recording the Ultimate Electronic Music Instrument*, veteran music technology journalist, educator, and performer Mark Vail tells the complete story of the synthesizer: the origins of the many forms the instrument takes; crucial advancements in sound generation, musical control, and composition made with instruments that may have become best sellers or gone entirely unnoticed; and the basics and intricacies of acoustics and synthesized sound. Vail also describes how to successfully select, program, and play a synthesizer; what alternative controllers exist for creating electronic music; and how to stay focused and productive when faced with a room full of instruments. This one-stop reference guide on all things synthesizer also

offers tips on encouraging creativity, layering sounds, performance, composing and recording for film and television, and much more.

Tempests after Shakespeare C. Zabus 2016-04-30 Tempests After Shakespeare shows how the 'rewriting' of Shakespeare's play serves as an interpretative grid through which to read three movements - postcoloniality, postpatriarchy, and postmodernism - via the Tempest characters of Caliban, Miranda/Sycorax and Prospero, as they vie for the ownership of meaning at the end of the twentieth century. Covering texts in three languages, from four continents and in the last four decades, this study imaginatively explores the collapse of empire and the emergence of independent nation-states; the advent of feminism and other sexual liberation movements that challenged patriarchy; and the varied critiques of representation that make up the 'postmodern condition'.

Rockbound Frank Parker Day 1989-05-01 Canada Reads 2005 Winner! In a David and Goliath style battle to the finish, Rockbound by Frank Parker Day triumphed over Oryx and Crake by Margaret Atwood and was declared the 2005 Canada Reads winner. In a series of debates that aired on the CBC in February, panelist Donna Morrissey, author of Kit's Law and Downhill Chance, passionately championed this 1928 novel about life and nature on the small maritime island of Rockbound. The victory has brought this Atlantic Province favourite back into the limelight and is receiving nationwide attention, appearing on several bestseller lists across the country. After its initial publication, Rockbound remained in out of print status until 1973, when the University of Toronto Press acquired the rights to publish as part of their 'Literature of Canada Prose and Poetry in Reprint' series. It was reprinted with an introduction by Allan Bevan of Dalhousie University's English Department. In 1989, Gerald Hallowell, an editor with the University of Toronto Press, rescued Rockbound from the backlist of the UTP catalogue. The book was reprinted with an afterword by Gwendolyn Davies, Dean of Graduate Studies and Associate Vice-President (Research) at the University of New Brunswick. UTP had been selling around 200 copies of the book per year, until Donna Morrissey selected it for the Canada Reads debates. Since then, UTP has sold over 35,000 copies and it has been reprinted three times! The University of Toronto Press would like to thank Donna Morrissey for her superb defense of the book and all of the people at the CBC for their support and encouragement. A complete synopsis of the debates, as well as an interactive timeline for Rockbound and Frank Parker Day can be found on their website, [www.cbc.ca/canadareads/index.html](http://www.cbc.ca/canadareads/index.html). Copies of Rockbound can be found in abundance at the University of Toronto Bookstore, [www.uoftbookstore.com](http://www.uoftbookstore.com), or at your local bookstore. To the harsh domain of Rockbound -- governed by the sternly righteous and rapacious Uriah Jung -- comes the youthful David Jung to

claim his small share of the island. Filled with dreamy optimism and a love for the unspoken promises of the night sky, David tries to find his way in a narrow, unforgiving, and controlled world. His conflicts are both internal and external, locking him in an unceasing struggle for survival; sometimes the sea is his enemy, sometimes his own rude behavior, sometimes his best friend Gershom Born, sometimes his secret love for the island teacher Mary Dauphiny; but always, inevitably, his Jung relatives and their manifold ambitions for money and power. The balance of life on Rockbound is precarious and thus fiercely guarded by all who inhabit its lonely domain, but just as a sudden change in the direction of the wind can lead to certain peril at sea, so too can the sudden change in the direction of a man's heart lead to a danger altogether unknown. Enormously evocative of the power, terror, and dramatic beauty of the Atlantic sea, and unrelenting in its portrait of back-breaking labour, cunning bitterness, and family strife, Rockbound is a story of many passions-love, pride, greed, and yearning -- all formed and buffeted on a small island by an unyielding wind and the rocky landscape of the human spirit.

The sound of distorted guitar of Jimi Hendrix, Pierre Henry's concrete music, Pink Floyd's rock psychedelic, Kraftwerk's electronic music, Daft Punk and rap T-Pain, have let emerge many effects: reverb, compression, distortion, auto-tune, filter, chorus, phasing, etc. The aim of this book is to introduce and explain these effects and sound treatments by addressing their theoretical and practical aspects.

Michael Lewis reveals how the Internet boom has encouraged changes in the way we live, work, and think. In the midst of one of the greatest status revolutions in the history of the world, the Internet has become a weapon in the hands of revolutionaries. Old priesthods are crumbling. In the new order, the amateur is king: fourteen-year-olds manipulate the stock market and nineteen-year-olds take down the music industry. Unseen forces undermine all forms of collectivism, from the family to the mass market: one black box has the power to end television as we know it, and another one may dictate significant changes in our practice of democracy.
