The First Cut Is the Deepest La'shonda Presha 2017-03-31 This book is a detailed depiction of the "cuts" that people incur or will incur over the course of their lives, and how those "cuts" subsequently shape their lives. (Cuts are hurts, experiences, tragedies, and/or various pains incurred). Unfortunately, people will inevitably incur hurts and pains in life, which most are beyond their own control. One simply cannot control what happens to them at the hands of another. People hurt other people. It's not so much the hurt that causes the problem, but more so the effects of the hurt. Oftentimes, people ignore the hurt. They try to live their lives as if the hurt never occurred. Many are oblivious to their deep hurt because they've mastered the art of disguising the pain. The problem ensues when the severely wounded people interact with others, then they subsequently inflict others with the residual hurt that they've been

harboring. Because of this, many fail to realize that they've been "cut" and are in need of healing. The purpose of this book is to aid in identifying and healing cuts from one's life (including their past, present, or possibly their future), as these cuts will affect one's life in some regard. Oftentimes, people need healing to recover from some trauma or tragedy that they've endured, yet they're too afraid to ask for help. Many internalize their feelings, never properly articulating their mental anguish, ultimately forsaking the need and opportunity to heal. It's the lack of healing that causes people to hurt others or live unhappy lives. This book was written to aid people with identifying their hurt, their need for healing, and ultimately helping them to heal and subsequently live their best lives.

Interest Rate Cycles Brian Romanchuk 2016-06-07 Monetary policy has increasingly become the focus of economists and investors. This report describes the factors driving interest rates across the economic cycle. Written by an experienced fixed income analyst, it explains in straightforward terms the theory that lies behind central bank thinking. Although monetary theory appears complex and highly mathematical, the text explains how decisions still end up being based upon qualitative views about the state of the economy. The text makes heavy use of charts of historical data to illustrate economic concepts and modern monetary history. The report is informal, but contains references and suggestions for further reading. This is the second report published by BondEconomics.

The Academic Entrepreneur John Paul Tabakian 2013-04-17 Public funding for community colleges has been steadily declining since the peak of funding in the 1970s. Surviving the constant threats of budgetary cuts has been a key motivating factor for community colleges to embrace academic entrepreneurialism. I examined the academic entrepreneurial pursuits of one California Community College (CCC) to understand those factors that encourage community college faculty to pursue academic entrepreneurial solutions. The purpose of this qualitative study is to examine factors that encourage academic entrepreneurialism among community college faculty. Specifically, I investigated three categories of factors that influence academic entrepreneurialism: individual, institutional, and environmental. Individual factors include demographic and background characteristics, including age, race, gender, academic training, and previous professional careers. Institutional factors include program offerings available for students, institutional reputation and history, institutional policies and practices, and academic and administrative leadership. Environmental factors relate to the peer influences of a campus that encourages academic entrepreneurial behavior of faculty. The significance of this study lies in the identification of factors that encourage academic entrepreneurialism among community college faculty, ultimately supporting institutional efforts to augment funding. I investigated individual, institutional, and environmental factors that encourage academic entrepreneurialism among community college faculty. Accordingly, the research questions identify key factors that encourage academic entrepreneurialism among community college faculty and explain how they facilitate faculty to engage in academic entrepreneurialism. The research questions that I evaluated in this study are: What individual, institutional, and environmental factors influence community college faculty to engage in academic entrepreneurialism? What is the relationship between faculty background, institutional, and environmental characteristics and the frequency and quality of academic entrepreneurialism among community college faculty? I found that all three factors are essential elements of academic entrepreneurialism among community college faculty. Individual, institutional, and environmental factors consist of people who are all pursuing their self-interest. This follows the tenets of rational choice theory as the study finds that self-interest influences faculty academic entrepreneurialism. The study argues that changes to institutional policies are the key determining factor to encourage academic entrepreneurialism among community college faculty. Institutional policies determine how a college functions and understands the interrelationship between individual, institutional, and environmental factors. Encouraging academic entrepreneurialism among community college faculty requires institutional policies that focus on the fundamental issue: recruiting, retaining, and evaluating community college faculty. The study offers suggestions for how to influence institutional policies that in turn encourage faculty academic entrepreneurialism by addressing the following areas: faculty job descriptions, faculty job announcements, evaluating faculty levels of academic entrepreneurialism, and offering entrepreneurial faculty financial incentives.

The Road Less Traveled Mark Fricks 2015-04-15 Money represents more than the paper it's printed on. It is the embodiment of your time, your talents, and your commitments. It buys the food you eat, the house you sleep in, the car you drive, and the clothes you wear. It also helps provide you with the lifestyle you want to live once you retire. You have spent a lifetime earning it, spending it, and hopefully, accumulating it. When the time comes for retirement, you want your money to provide you with a comfortable lifestyle and stable income after your working days are done. You might also have other desires, such as traveling, purchasing property, or moving to be closer to your family (or farther away). You may also want your assets to provide for your loved ones after you are gone. The truth is that it takes more than just money to fulfill those needs and desires. Your income, your plans for retirement, your future healthcare expenses, and the continued accumulation of your assets after you stop working and drawing a paycheck all rely on one thing: You.

Boys Adrift Leonard Sax 2016-06-28 Why America's sons are underachieving, and what we can do about it. Something is happening to boys today. From kindergarten to college, American boys are, on average, less resilient and less ambitious than they were a mere twenty years ago. The gender gap in college attendance and graduation rates has widened dramatically. While Emily is working hard at school and getting A's, her brother Justin is goofing off. He's more concerned about getting to the next level in his videogame than about finishing his homework. In *Boys Adrift*, Dr. Leonard Sax delves into the scientific literature and draws on more than twenty years of clinical experience to explain why boys and young men are failing in school and disengaged at home. He shows how social, cultural, and biological factors have created an environment that is literally toxic to boys. He also presents practical solutions, sharing strategies which educators have found effective in re-engaging these boys at school, as well as handy tips for parents about everything from homework, to videogames, to medication.

We are living in a time-poor society, working more than ever and with less time for ourselves and family. The pressures and stress of the obligations we feel we have, often leave us without time to do everything that we would like to. More critically, we lack the time to reflect, review our lives and consider our direction. Time to contemplate if the decisions we are making are going to lead us to a life of purpose or an old age filled with regret. Time for Anything is based on 5 years of research by Craig D Robinson. Using the techniques in this book, Craig went from working in an entry level position to, in just four years: start 2 companies, recharge with 12 weeks holiday a year, start a family, grow and sell his startups and retire at the age of 34. This book shows you how you too can have time for it all.

Gold, Glory, Girls Paul J. Young 2015-11-13 I want to talk with you about these drives that all men have; gold, glory and girls. I want to keep you from the emptiness that you will certainly experience if these three G's are the focus of your life. Then I want to talk about God, but not in a stuffy, churchy way. You don't need the typical religious approach to life. This often leads to boredom, guilt, business and frankly substitutes the emptiness of gold, glory and girls with another kind of emptiness peddled as the answer to life. I am not going to take you there. I want you to fill the emptiness in your heart and help you find a joy and fulfillment that you have never had before. I want you to experience manly challenge, incredible achievement and find out why you were really made - your true life's purpose. So buckle your seat belt. Get ready for the ride of your life!
