The Mathematical Theory of Communication Claude E Shannon 1998-09-01 Scientific knowledge grows at a phenomenal pace--but few books have had as lasting an impact or played as important a role in our modern world as The Mathematical Theory of Communication, published originally as a paper on communication theory more than fifty years ago. Republished in book form shortly thereafter, it has since gone through four hardcover and sixteen paperback printings. It is a revolutionary work, astounding in its foresight and contemporaneity. The University of Illinois Press is pleased and honored to issue this commemorative reprinting of a classic.

Multicultural Education James A. Banks 2019-11-12 As diversity continues to increase in the United States, ethnic, cultural, social-class, and linguistic gaps are widening between teachers and their students. The rapidly changing educational landscape presents unique challenges and opportunities for addressing diversity both creatively and constructively in schools.

Multicultural Education helps current and future educators fully understand sophisticated concepts of culture; become more effective practitioners in diverse classrooms; and view race, class, gender, social class, and exceptionality as intersectional concepts. Now in its tenth edition, this bestselling textbook assists educators to effectively respond to the ways race, social class, and gender interact to influence student behavior and learning. Contributions from leading authorities in multicultural education discuss the effects of class and religion on education; differences in educational opportunities for male, female, and LGBTQ students; and issues surrounding non-native English speakers, students of color, and students with disabilities.

Contemporary in relevance, this timely volume promotes multicultural education as a process of school reform. Practical advice helps teachers increase student academic achievement, work effectively with parents, improve classroom assessment, and benefit from diversity.

Why Evolution is True Jerry A. Coyne 2010-01-14 For all the discussion in the media about creationism and 'Intelligent Design', virtually nothing has been said about the evidence in question - the evidence for evolution by natural selection. Yet, as this succinct and important book shows, that evidence is vast, varied, and magnificent, and drawn from many disparate fields of science. The very latest research is uncovering a stream of evidence revealing evolution in action - from the actual observation of a species splitting into two, to new fossil discoveries, to the deciphering of the evidence stored in our genome. Why Evolution is True weaves together the many threads of modern work in genetics, palaeontology, geology, molecular biology, anatomy, and development to demonstrate the 'indelible stamp' of the processes first proposed by Darwin. It is a crisp, lucid, and accessible statement that will leave no one with an open mind in any doubt about the truth of evolution.

From GCSEs to EBCs Great Britain. Parliament. House of Commons. Education Committee 2013-01-31 The Government's plans for replacing GCSEs with new English Baccalaureate Certificates in some subjects is trying to do too much, too fast. Introducing several fundamental changes at the same time and to a tight timetable will jeopardise the quality of the reforms and may threaten the stability of the wider exam system. GCSEs need "significant improvements" in order to restore public confidence in the exam system, but the Government still needs to make the case that the GCSE brand is so discredited that it is beyond repair. MPs are also concerned about the impact of the changes on subjects outside the English Baccalaureate, where students will be taking GCSEs for some time to come, according to the Government's plans. The report also questions how well the Government's proposals will serve lower attaining pupils, who are often the most disadvantaged. There is no evidence that the proposed changes will help to tackle under-achievement or narrow the attainment gap between the richest and poorest students any more effectively than GCSEs. The Government is also called upon to re-think its plans for a Statement of Achievement specifically for lower attaining pupils. MPs agree that changes are needed to the way in which exams are run, but they raise serious concerns about franchising subjects to exam boards. The report is critical of the Government's decision to abolish some GCSEs before publishing the outcomes of the National Curriculum Review and its proposed changes to the school accountability system. MPs also note the wide-ranging stakeholder opposition to many of the Government's proposals.
