Historical Archaeologies of the Caribbean Todd M. Ahlman 2019 New perspectives on Caribbean historical archaeology that go beyond the colonial plantation Historical Archaeologies of the Caribbean: Contextualizing Sites through Colonialism, Capitalism, and Globalism addresses issues in Caribbean history and historical archaeology such as freedom, frontiers, urbanism, postemancipation life, trade, plantation life, and new heritage. This collection moves beyond plantation archaeology by expanding the knowledge of the diverse Caribbean experiences from the late seventeenth through the mid-nineteenth centuries. The essays in this volume are grounded in strong research programs and data analysis that incorporate humanistic narratives in their discussions of Amerindian, freedmen, plantation, institutional, military, and urban sites. Sites include a sample of the many different types found across the Caribbean from a variety of colonial contexts that are seldom reported in archaeological research, yet constitute components essential to understanding the full range and depth of Caribbean history. Contributors examine urban contexts in Nevis and St. John and explore the economic connections between Europeans and enslaved Africans in urban and plantation settings in St. Eustatius. The volume contains a pioneering study of frontier exchange with Amerindians in Dominica and a synthesis of ceramic exchange networks among enslaved Africans in the Leeward Islands. Chapters on military forts in Nevis and St. Kitts call attention to this often-neglected aspect of the Caribbean colonial landscape. Contributors also directly address culture heritage issues relating to community participation and interpretation. On St. Kitts, the legacy of forced confinement of lepers ties into debates of current public health policy. Plantation site studies from Antigua and Martinique are especially relevant because they detail comparisons of French and British patterns of African enslavement and provide insights into how each addressed the social and economic changes that occurred with emancipation. Steam Trains Today Andrew Martin 2021-04-29 'A delightful book ... the perfect companion as you wait for the 8.10 from Hove' Observer After the Beeching cuts of the 1960s, many railways were gradually shut down. Rural communities were isolated and steam trains slowly gave way to diesel and electric traction. But some people were not prepared to let the romance of train travel die. Thanks to their efforts, many lines passed into community ownership and are now booming with new armies of dedicated volunteers. Andrew Martin meets these volunteer enthusiasts, finding out just what it is about preserved railways that makes people so devoted. From the inspiration for Thomas the Tank Engine to John Betjeman's battle against encroaching modernity, Steam Trains Today will take you on a heart-warming

journey across Britain from Aviemore to Epping.

Delaware Air National Guard Brig Gen Kennard R. Wiggins Jr. (DE ANG Ret) 2008-11-17 The Delaware Air National Guard got its start when a group of World War II veterans formed a new National Guard unit composed of surplus airplanes, combat experience, a measure of hard work, camaraderie, and fun. Some called this assemblage a gentleman's flying club, but in a few short years, it was tested for the first time in the Korean War. Since then, the Delaware Air National Guard has flown and fought in almost every corner of the globe. It answered the call in Vietnam, the Middle East, the Balkans, and most recently in Iraq and Afghanistan. Celebrating 60 years of service, it has become a well-known local institution. The "Blue Hen Air Force" has evolved into a professional organization that shoulders a significant operational role for the U.S. Air Force and serves as a versatile emergency resource for the state of Delaware.

The Sikorsky Legacy Sergei I. Sikorsky 2007 This book traces the history of Sikorsky aviation and its founder, Igor I. Sikorsky, one of the most talented and versatile aeronautical pioneers in history. Sikorsky's aviation career spanned over 60 years and was highlighted by three major achievements: the creation of the world's first four-engine airliner; the record-breaking Clipper Ships, with which Pan American Airways explored transpacific and transatlantic airline service; and the development of the helicopter. Sikorsky then led his engineers out of the piston-engine era and into the jet age with the design and development of some of the most widely used turbine-powered helicopters in aviation history. More than 200 photographs, many from the Sikorsky family archives, document the genius of Sikorsky's intuitive engineering and his lifelong interest in the challenge of the helicopter, which many historians consider to be his crowning achievement.
