Catalog of British Motorcycles Floyd Clymer 2014-03 84 pages, 83 black & white illustrations, size 8.25 x 11 inches. Published in the USA under the same title in 1951 by Floyd Clymer, the original publication was a pocket sized landscape format book and it is often criticized as difficult to read due to its small print size. Consequently, this edition was re-formatted into a larger and more conventional portrait size which has increased the text size by almost 40%. This publication provides the reader with an insight into the country, and the manufacturers, that were ultimately destined to succumb to the dominance of the Japanese motorcycle industry. A total of 33 different British motorcycle manufacturers and their various models are included and sadly, less than a handful of those 33 manufacturers survive today. A 'must have' resource for any motorcycle enthusiast and an invaluable reference for anyone interested in British 'iron'. Many of the motorcycles featured within are highly collectible today and the predominance of these early manufacturers no longer exist. This truly historical documentation of the glory years of British motorcycle manufacturing has been out-of-print and unavailable for many years and is becoming increasingly more difficult to find on the secondary market. We are pleased to be able to offer this reproduction as a service to all motorcycle enthusiasts worldwide.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.
