Effects of Context-oriented Learning on Student Interest and Achievement in Chemistry Education Sabine Fechner 2009 Der Chemieunterricht sieht sich nicht erst seit PISA mit dem Anspruch konfrontiert, einerseits die Lernenden von der Relevanz des Faches zu überzeugen und andererseits zu gewährleisten, dass sie genug vernetztes Konzeptwissen erwerben, um eine naturwissenschaftliche Berufslaufbahn wählen zu können. An diesem Spannungsfeld setzt die vorgestellte Studie an: anhand eines experimentellen Designs wird der Erwerb von Wissen in lebensweltlichen im Gegensatz zu fachlichen Kontexten evaluiert. Fünf Experimentierphasen dienen als Grundlage, um die Effizienz der jeweiligen Kontexte in Verbindung mit wiederholenden Vernetzungsmaßnahmen zu untersuchen. Die gewählten Messinstrumente ermöglichen hierbei eine detaillierte Beschreibung der Effekte der Interventionsmaßnahmen beim kooperativen Arbeiten im Chemieunterricht. Especially since the weak results of German students in large-scale assessments like PISA, chemistry education has been challenged: It is supposed to bridge the gap between making it relevant to the learner and ensuring that learners acquire enough content knowledge to cope with university demands. The presented study emanates from this ambiguity by evaluating the acquisition of content knowledge in different contexts. By means of an experimental design, student learning gains in tasks with a real life problem situation are compared to a laboratory setting. A one-week intervention serves as a basis to assess the effects of such contexts in a collaborative and inquiry-based learning environment. The selected test instruments offer the possibility to shed

light on differentiated effects of contexts with relation to learner prerequisites.

Mentor Texts Lynne R. Dorfman 2017 It's been a decade since Lynne Dorfman and Rose Cappelli wrote the first edition of *Mentor Texts* and helped teachers across the country make the most of high-quality children's literature in their writing instruction. In the second edition of this important book Lynne and Rose show teachers how to help students become confident, accomplished writers by using literature as their foundation. The second edition includes brand-new "Your Turn Lessons," built around the gradual release of responsibility model, offering suggestions for demonstrations and shared or guided writing. Reflection is emphasized as a necessary component to understanding why mentor authors chose certain strategies, literary devices, sentence structures, and words. Lynne and Rose offer new children's book titles in each chapter and in a carefully curated and annotated *Treasure Chest*. At the end of each chapter a "Think About It--Talk About It--Write About It" section invites reflection and conversation with colleagues. The book is organized around the characteristics of good writing--focus, content, organization, style, and conventions. Rose and Lynne write in a friendly and conversational style, employing numerous anecdotes to help teachers visualize the process, and offer strategies that can be immediately implemented in the classroom. This practical resource demonstrates the power of learning to read like writers.

The Orphans of Davenport: Eugenics, the Great Depression, and the War over Children's Intelligence Marilyn Brookwood 2021-07-27 The fascinating—and eerily

timely—tale of the forgotten Depression-era psychologists who launched the modern science of childhood development. “Doomed from birth” was how psychologist Harold Skeels described two toddler girls at the Iowa Soldiers’ Orphans’ Home in Davenport, Iowa, in 1934. Their IQ scores, added together, totaled just 81. Following prevailing eugenic beliefs of the times, Skeels and his colleague Marie Skodak assumed that the girls had inherited their parents’ low intelligence and were therefore unfit for adoption. The girls were sent to an institution for the “feebleminded” to be cared for by “moron” women. To Skeels and Skodak’s astonishment, under the women’s care, the children’s IQ scores became normal. Now considered one of the most important scientific findings of the twentieth century, the discovery that environment shapes children’s intelligence was also one of the most fiercely contested—and its origin story has never been told. In *The Orphans of Davenport*, psychologist and esteemed historian Marilyn Brookwood chronicles how a band of young psychologists in 1930s Iowa shattered the nature-versus-nurture debate and overthrew long-accepted racist and classist views of childhood development. Transporting readers to a rural Iowa devastated by dust storms and economic collapse, Brookwood reveals just how profoundly unlikely it was for this breakthrough to come from the Iowa Child Welfare Research Station. Funded by the University of Iowa and the Rockefeller Foundation, and modeled on America’s experimental agricultural stations, the Iowa Station was virtually unknown, a backwater compared to the renowned psychology faculties of Stanford, Harvard, and Princeton. Despite the challenges they faced, the Iowa psychologists replicated increased intelligence in thirteen more “retarded” children. When Skeels published their incredible work, America’s leading psychologists—eugenicists all—attacked and condemned his conclusions. The loudest critic was Lewis M. Terman, who advocated for forced sterilization of low-intelligence women and whose own widely accepted IQ test was threatened by the Iowa research. Terman and his opponents insisted that intelligence was hereditary, and their prestige ensured that the research would be ignored for decades. Remarkably, it was not until the 1960s that a new generation of psychologists accepted environment’s role in intelligence and helped launch the modern field of developmental neuroscience.. Drawing on prodigious archival research, Brookwood reclaims the Iowa researchers as intrepid heroes and movingly recounts the stories of the orphans themselves, many of whom later credited the psychologists with giving them the opportunity to forge successful lives. A radiant story of the power and promise of science to better the lives of us all, *The Orphans of Davenport* unearths an essential history at a moment when race science is dangerously resurgent.

At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything.
