Finally, a definitive book that delivers many unknown facts about every aspect of caring for and sharing your life with a cat, ranging from proper nutrition and strange behavior to medical care and multi-cat households, to grooming and geriatrics. There are more than 90 million American households that count cats as family members, but they are a vastly underserved population, devoted to their kitties, yet bereft of all the public attention, programming, and print devoted to dogs. Now, bestselling author and investigative journalist Tracie Hotchner offers them The Cat Bible, with straightforward, fact-filled solutions to health and behavior problems, based on years of research into the real reasons behind these issues. In the same warm, straightforward style that attracts devoted listeners to her radio shows, Tracie tackles controversial topics such as the truth about commercial dry pet foods and their dangers, bringing readers the latest facts on every topic that affects a feline's well-being.

Underwater Dogs Seth Casteel 2012-10-23 The exuberant, exhilarating photographs of dogs underwater that have become a sensation From the water's surface, it's a simple exercise: a dog's leap, a splash, and then a wet head surfacing with a ball, triumphant. But beneath the water is a chaotic ballet of bared teeth and bubbles, paddling paws, fur and ears billowing in the currents. From leaping Lab to diving Dachshund, the water is where a dog's distinct personality shines through; some lounge in the current, paddling slowly, but others arch their bodies to cut through the water with the focus and determination of a shark. In more than eighty portraits, award-winning pet photographer and animal rights activist Seth Casteel captures new sides of our old friends with vibrant underwater photography that makes it impossible to look away. Each image bubbles with exuberance and life, a striking reminder that even in the most loveable and domesticated dog, there are more primal forces at work. In *Underwater Dogs*, Seth

Casteel gives playful and energetic testament to the rough-and-tumble joy that our dogs bring into our lives.

Fighting Scholars Raúl Sánchez García 2014-12-01 'Fighting Scholars' offers the first book-length overview of the ethnographic study of martial arts and combat sports. The book's main claim is that such activities represent privileged grounds to access different social dimensions, such as emotion, violence, pain, gender, ethnicity and religion. In order to explore these dimensions, the concept of 'habitus' is presented prominently as an epistemic remedy for the academic distant gaze of the effaced academic body.

The book's most innovative features are its empirical focus and theoretical orientation. While ethnographic research is a widespread and popular approach within the social sciences, combat sports and martial arts have yet to be sufficiently interrogated from an ethnographic standpoint. The different contributions of this volume are aligned within the same project that began to crystallize in Loïc Wacquant's 'Body and Soul': the construction of a 'carnal sociology' that constitutes an exploration of the social world 'from' the body.
