Blood-Kissed Sky J. A. London 2012-12-26 The second book in a romantic and drama-packed trilogy perfect for fans of Rachel Vincent, Julie Kagawa, and Alyson Noel. Lusciously romantic and full of action-packed drama, readers will be swept away by this thrilling novel. Dawn Montgomery knows that monsters really do come out at night—after all, they are her job. It’s just after the thirty-year war between vampires and humans, and as an ambassador between the two sides (a role she inherited when her parents were killed), Dawn quickly learns that balancing schoolwork, teen life, and the requests of Lord Valentine, the most frightening vampire in the region, isn’t easy. There's nowhere left to hide. I thought vampires were our enemies—they controlled our lives, isolated our cities, and demanded our blood—until I met Victor. With Victor taking over as the new Lord Valentine, things were supposed to get better. Instead, they're worse than ever. Day Walkers, a new breed of vampires who can walk in the sun, are terrorizing the city. Blood supplies are low, and if Victor's vampires don't get enough, they will become infected with the Thirst—a disease that will turn them into mindless killers. To stop it, I must journey across the desolate wasteland to the very place where the sickness began. I can only hope that the answers that await me are enough to save us all...before it's too late.

26 Marathons Meb Keflezighi 2020-10-27 "Four-time Olympic marathoner Meb Keflezighi shares his lessons on life, family, faith, and running through a reflection on each of the 26 marathons he's run in his storied career. When four-time Olympian Meb Keflezighi ran his final marathon in New York City on November 5, 2017, it marked the end of an extraordinary distance-running career. Meb will be remembered as the only person in history to win both the Boston and New York City marathons as well as an Olympic marathon silver medal. Meb's last marathon was also his 26th, and each of those 26 marathons has come with its own unique challenges, rewards, and outcomes for him. Through focused narrative, Meb describes key moments and triumphs that made each marathon a unique learning experience and shows runners--whether recreational or professional--how to apply the lessons he's learned to their own running and lives. Chronologically organized by marathon, 26 Marathons offers wisdom Meb has gleaned about life, family, identity, and faith in addition to tips about running, training, and nutrition. Equal parts inspiration and practical advice, this book will provide readers an inside look at the life and success of one of the greatest runners living today"--

The City in Transgression Benedict Anderson 2020-07-27 The City in Transgression explores the unacknowledged, neglected, and ill-defined spaces of the built environment and their transition into places of resistance and residence by refugees, asylum seekers, migrants, the homeless, and the disadvantaged. The book draws on urban and spatial theory, socio-economic factors, public space, and architecture to offer an intimate look at how urban sites and infrastructure are transformed into spaces for occupation. Anderson proposes that the varied innovations and adaptations of urban spaces enacted by such marginalized figures – for whom there are no other options – herald a radical new spatial programming of cities. The book explores cities and sites such as Mexico City and London, the Mexican/US border, the Calais Jungle, and Palestinian camps in Beirut and utilizes concepts associated with ‘mobility’ – such as anarchy, vagrancy, and transgression – alongside photography, 3D modelling, and 2D imagery. From this constellation of materials and analysis, a radical spatial picture of the city in transgression emerges. By focusing on the ‘underside of urbanism’, The City in Transgression reveals the potential for new spatial networks that can cultivate the potential for self-organization so as to counter the existing dominant urban models of capital and property and to confront some of the major issues facing cities amid an age of global human mobility. This book is valuable reading for those interested in architectural theory, modern history, human geography and mobility, climate change, urban design, and transformation.

The State of the World's Children 2012 United Nations 2012-01-30 While cities have long been associated with employment, development and economic growth, hundreds of millions of children in the world's urban areas are growing up amid scarcity and deprivation. This publication presents the hardships these children face as violations of their rights, as well as impediments to fulfilling the Millennium Development Goals. It examines major phenomena shaping the lives of children in urban settings, including migration, economic shocks and acute disaster risk. It also provides examples of efforts to improve the urban realities that children confront and identifies broad policy actions that should be included in any strategy to reach excluded children and foster equity in urban settings driven by disparity.

Differential Equations Robert P. Gilbert 2021-06-29 This book illustrates how MAPLE can be used to supplement a standard, elementary text in ordinary and partial differential equation. MAPLE is used with several purposes in mind. The authors are firm believers in the teaching of mathematics as an experimental science where the student does numerous calculations and then synthesizes these experiments into a general theory. Projects based on the concept of writing generic programs test a student's understanding of the theoretical material of the course. A student who can solve a general problem certainly can solve a specialized problem. The authors show MAPLE has a built-in program for doing these problems. While it is important for the student to learn MAPLE? in built programs, using these alone removes the student from the conceptual nature of differential equations. The goal of the book is to teach the students enough about the computer algebra system MAPLE so that it can be used in an investigative way. The investigative materials which are present in the book are done in desk calculator mode DCM, that is the calculations are in the order command line followed by output line. Frequently, this approach eventually leads to a program or procedure in MAPLE designated by proc and completed by end proc. This book was developed through ten years of instruction in the differential equations course.

Robert P. Gilbert holds a Ph.D. in mathematics from Carnegie Mellon University. He and Jerry Hile originated the method of generalized hyperanalytic function theory. Dr. Gilbert was professor at Indiana University, Bloomington and later became the Unidel Foundation Chair of Mathematics at the University of Delaware. He has published over 300 articles in professional journals and conference proceedings. He is the Founding Editor of two mathematics journals Complex Variables and Applicable Analysis. He is a three-time Awardee of the Humboldt-Preis, and. received a British Research Council award to do research at Oxford University. He is also the recipient of a Doctor Honoris Causa from the I. Vekua Institute of Applied Mathematics at Tbilisi State University. George C. Hsiao holds a doctorate degree in Mathematics from Carnegie Mellon University. Dr. Hsiao is the Carl J. Rees Professor of Mathematics Emeritus at the University of Delaware from which he retired after 43 years on the faculty of the Department of Mathematical Sciences. Dr. Hsiao was also the recipient of the Francis Alison Faculty Award, the University of Delaware's most prestigious faculty honor, which was bestowed on him in recognition of his scholarship, professional achievement and dedication. His primary research interests are integral equations and partial differential equations with their applications in mathematical physics and continuum mechanics. He is the author or co-author of more than 200 publications in books and journals. Dr. Hsiao is world-renowned for his expertise in Boundary Element Method and has given invited lectures all over the world. Robert J. Ronkese holds a PhD in applied mathematics from the University of Delaware. He is a professor of mathematics at the US Merchant Marine Academy on Long Island. As an undergraduate, he was an exchange student at the Swiss Federal Institute of Technology (ETH) in Zurich. He has held visiting positions at the US Military Academy at West Point and at the University of Central Florida in Orlando.

Looptail Bruce Tip 2014-04-03 Looptail is Bruce Poon Tip's extraordinary first-person account of his entrepreneurial instincts to start and develop G Adventures, the highly successful international travel adventure company - and along the way he reveals his unusual management secrets that not only keep his employees fully engaged and energized but also keep his customers extremely happy. His unique approach has worked in marvellous ways. Poon Tip has created an entirely new and refreshing approach to management. For example, there is no CEO at G Adventures - instead, every employee is a CEO, empowered to make instantaneous decisions to help clients on the spot. But while there's no CEO, there is a company Mayor, who take the pulse of corporate morale. There's no HR department - but there is a Talent Agency and company Culture Club. It hasn't always been easy to try to balance his desire for a socially responsible company along with the desire to generate profits. But thanks to Poon Tip's vision, G Adventures has flourished and has done its best to maintain its looptail approach. In short, it's been an extraordinary ride, and in many ways G Adventures is at the

vanguard of what modern-day companies are beginning to look like.

Text Analysis for the Social Sciences Carl W. Roberts 2020-07-25 This book provides descriptions and illustrations of cutting-edge text analysis methods for communication and marketing research; cultural, historical-comparative, and event analysis; curriculum evaluation; psychological diagnosis; language development research; and for any research in which statistical inferences are drawn from samples of texts. Although the book is accessible to readers having no experience with content analysis, the text analysis expert will find substantial new material in its pages. In particular, this collection describes developments in semantic and network text analysis methodologies that heretofore have been accessible only among a smattering of methodology journals. The book's international and cross-disciplinary content illustrates the breadth of quantitative text analysis applications. These applications demonstrate the methods' utility for international research, as well as for practitioners from the fields of sociology, political science, journalism/communication, computer science, marketing, education, and English. This is an "ecumenical" collection that contains applications not only of the most recent semantic and network text analysis methods, but also of the more traditional thematic method of text analysis. In fact, it is originally with this volume that these two "relational" approaches to text analysis are defined and contrasted with more traditional "thematic" text analysis methods. The emphasis here is on application. The book's chapters provide guidance regarding the sorts of inferences that each method affords, and up-to-date descriptions of the human and technological resources required to apply the methods. Its purpose is as a resource for making quantitative text analysis methods more accessible to social science researchers.

You Gotta Be Kidding! Workman Publishing 2020-07-14 Gross, embarrassing, and just plain silly questions about boogers, bugs, smelly socks, itchy scabs, and more! Adapted from the hugely popular board game, this interactive and completely engaging book serves up hundreds of bizarre, embarrassing, sometimes ethical and sometimes stomach-churning dilemmas that kids will love to pose to their friends and siblings, whether in the backseat, on a sleepover, at a party, on a rainy day, or during a lull in the lunchroom (if you dare). Ponder the icky: Would you rather eat 10 pounds of cheese -OR- a bucket of peanut butter—with nothing to drink? The exponentially icky: Would you rather drink liquid found leaking from a garbage can -OR- chew on a hairy clump found between the cushions of an old couch? The fantastic: Would you rather be able to talk with all animals -OR- be able to understand all languages? The priority-testing: As a soccer player, would you rather mess up and score a goal for the other team but still have your team win -OR- play your best game ever even though your team loses? And the hair-raising: Would you rather swim across a river that is filled with crocodiles -OR- spend the night on an island where man-eating tigers live? Fascinating sidebars throughout are filled with interesting ancillary information—the nature of drool, left-handedness vs. right-handedness, what's dangerously filthy and what's just gross, why we blush when we're embarrassed—so kids can learn something as they laugh!

Still Running Vanessa Zusei Goddard 2020-08-11 Learn how to bring the power of stillness into your running practice with meditations, guidance, and inspiration from a long-time runner and Zen practitioner. Running is more than just exercise. Running is a practice, a moving meditation, that brings the power of stillness to all the activities in our lives. Vanessa Zusei Goddard combines her experience leading running retreats with her two-decade practice of Zen to offer insight, humor, and practical guidance for grounding our running, or any physical practice, in meditation. When we see running solely as exercise and focus on improving our times, covering a certain number of miles, or losing weight, we miss the deeper implications of this art. Whether you are a new or experienced runner, you will learn how to be more embodied through thirteen running practices to help improve your focus and running form. Using mantras and visualizations, as well as a range of other exercises, Goddard offers ways to practice running as a moving meditation with an eye toward bringing the power of stillness to all the activities in your life. Ultimately, *Still Running* is a book about freedom, ease, and the joy of movement; it's about the power of stillness and learning how to use that power to live wholeheartedly.

Using Creativity to Address Dyslexia, Dysgraphia, and Dyscalculia Fredricka Reisman 2020-11-18 Designed to help educators recognize and nurture students with dyslexia, dysgraphia, and dyscalculia, this book guides readers through best practices for using creativity theory and strategies to address the learning challenges for students who have difficulty in acquiring literacy and mathematics content. Offering concrete examples of creativity assessment and pedagogical techniques, chapters are supported by rich appendices providing assessment and screening checklists, time telling objectives, learning trouble spots, a creative approach to teaching place value, and a handy cross-referencing table.

Accessible and thorough, this up-to-date guide will help educators develop strategies that acknowledge students' creative strengths to address learning challenges across the literacy and mathematics curricula.

Global Nutrition Report 2014 International Food Policy Research Institute 2014-11-13 At the 2013 Nutrition for Growth Summit in London, 96 signatories (governments, civil society organizations, donors, United Nations' agencies, and businesses) agreed to support the creation of an annual report on global nutrition that would be authored by an independent expert group, in partnership with a large number of contributors. The first edition of this report, the *Global Nutrition Report 2014*, puts a spotlight on worldwide progress by the 193 member countries of the United Nations in improving their nutrition status, identifies bottlenecks to change, highlights opportunities for action, and contributes to strengthened nutrition accountability on country and global levels.

Knocking at God's Door Oswald Chambers 2015-10-30 Lord, my chief desire is to be rooted and grounded in you—God-centered and God-absorbed, God-enthused and God-loved. How eager my soul is to know you and be still! Learn how to pray through the prayers of a man totally surrendered to Christ. Selected and arranged by Bidy Chambers from her husband's personal diary, this collection of 365 prayers provides a unique glimpse into the spiritual life of Oswald Chambers, author of the classic devotional *My Utmost for His Highest*. Exhibiting humility and perseverance, these petitions encourage you to knock at God's door, enter into His presence, and live your "utmost for His highest."

Applied Nonlinear Control Jean-Jacques E. Slotine 1991 In this work, the authors present a global perspective on the methods available for analysis and design of non-linear control systems and detail specific applications. They provide a tutorial exposition of the major non-linear systems analysis techniques followed by a discussion of available non-linear design methods.

Metaphysics and Hermeneutics in the Medieval Platonic Tradition Stephen Gersh 2020-11-10 *Metaphysics and Hermeneutics in the Medieval Platonic Tradition* consists of twelve essays originally published between 2006 and 2015, dealing with main trends and specific figures within the medieval Platonic tradition. Three essays provide general surveys of the transmission of late ancient thought to the Middle Ages with emphasis on the ancient authors, the themes, and their medieval readers, respectively. The remaining essays deal especially with certain major figures in the Platonic tradition, including pseudo-Dionysius the Areopagite, Iohannes Scottus Eriugena, and Nicholas of Cusa. The principal conceptual aim of the collection is to establish the primacy of hermeneutics within the philosophical program developed by these authors: in other words, to argue that their philosophical activity, substantially albeit not exclusively, consists of the reading and evaluation of authoritative texts. The essays also argue that the role of hermeneutics varies in the course of the tradition between being a means towards the development of metaphysical theory and being an integral component of metaphysics itself. In addition, such changes in the status and application of hermeneutics to metaphysics are shown to be accompanied by a shift from emphasizing the connection between logic and philosophy to emphasizing that between rhetoric and philosophy. The collection of essays fills in a lacuna in the history of philosophy in general between the fifth and the fifteenth centuries. It also initiates a dialogue between the metaphysical hermeneutics of medieval Platonism and certain modern theories of hermeneutics, structuralism, and deconstruction. The book will be of special interest to students of the classical tradition in western thought, and more generally to students of medieval philosophy, theology, history, and literature.

Colonial Lives Richard E. Boyer 2000 *Colonial Lives* offers a rich variety of archival documents in translation which bring to life the political and economic workings of Latin American colonies during 300 years of Spanish rule, as well as the day-to-day lives of the colonies' inhabitants. Intended to complement textbooks such as Burkholder and Johnson's *Colonial Latin America* by presenting students with primary sources -- the raw materials on which the facts in other textbooks are based -- this reader strives to illustrate the impact of issues such as race, class, gender, sexuality, culture and religion in the daily lives of both natives and colonists alike. The concerns, struggles and perspectives of the inhabitants of colonial Latin America are reflected in transcripts of civil and criminal court cases, administrative reviews, ecclesiastical investigations, Inquisition trials, wills, and letters the editors have included in this reader. Each document is prefaced by an introduction that places it in the social and political context of the period. The book also includes a glossary of terms and lists of suggested further readings. Most uniquely, the book offers helpful thematic cross-referencing sections and an index of themes which allow instructors to easily adapt the book to their courses and to assign readings according to the criteria of their own specific curriculums.

Student Solutions Manual, Vol. 1 for Swokowski's Calculus Earl W Swokowski 2000-06-30 Prepare for exams and succeed in your mathematics course with this comprehensive solutions manual! Featuring worked out-solutions to the problems in *CALCULUS: THE CLASSIC EDITION*, 5th Edition, this manual shows you how to approach and solve problems using the same step-by-step explanations found in your textbook examples.

High Tide Jude Deveraux 2012-12-11 Fiona is the creator of fashion doll sensation Kimberley, and is quite satisfied with her career-focused life. Yet when her boss informs her that she must win over a new account by going camping with the creator of a hit children's TV show, she is extremely reluctant. Nevertheless, she goes to Florida to meet Roy and his Guide Ace Montgomery. When Roy is found dead with Fiona holding the bloody knife, she becomes the prime suspect - though she has no recollection of what happened. Things get worse when she learns that Roy, until now a stranger to her, left her all the proceeds from his new TV show, giving her a strong motive for murder. Suddenly, she and Ace find themselves on the run, and being condemned by the press for murder. They must prove their innocence by discovering the true motive and murderer of Roy. Fiona and Ace figure out they are linked through her father, and it is then that Fiona learns the secrets of her family's past, turning her world upside down.

Malnutrition Johanna B. Knudsen 2012 Malnutrition is the condition that results from taking an unbalanced diet in which certain nutrients are lacking, in excess, or in the wrong proportions. A number of different nutritional disorders may arise,

depending on which nutrients are under or overabundant in the diet. In this book, the authors examine topical research regarding the risk factors and health effects of malnutrition. Some of the topics discussed in the book include metabolic disorders due to nutritional changes during the prenatal stage; malnutrition in the elderly; malnutrition in inflammatory bowel diseases and genotoxic effects of malnutrition and infections in children. (Imprint: Nova)

The Road to Good Nutrition M. Eggersdorfer 2013-09-11 This is a work of advocacy, whose prime objective is to inform people about the relationship between nutrition security and public health. It draws on the thinking and experience of a selected number of experts in the field of nutrition and public health. Collating up-to-the-minute information in a clear and accessible way, the book forms a 'one-stop information source', and paves the way for further, science-led publications in this field. 'The Road to Good Nutrition' puts the topic of nutrition security on the agenda of policy-makers, academics, private sector organizations and civil society, as well as of organizations dedicated to the nutrition space. It is also of interest to the educated lay reader who is generally well informed in matters of health, nutrition and sustainability.

Irishness and Womanhood in Nineteenth-century British Writing Thomas J. Tracy 2009 Using Lady Morgan's *The Wild Irish Girl* as his point of departure, Thomas J. Tracy argues that nineteenth-century debates over what constitutes British national identity often revolved around representations of Irishness, especially Irish womanhood. He maps the genealogy of this development in fiction, political discourse, and the popular press, from Edgeworth's *Castle Rackrent* through Trollope's Irish novels, focusing on the pivotal period from 1806 through the 1870s.

The Essential Theatre Oscar Gross Brockett 2013-03-28 Engage your students and get them excited about theatre with the Enhanced Tenth Edition of *THE ESSENTIAL THEATRE*, International Edition. The combined authorship of an authoritative theatre historian and his former student—an active theatre practitioner and historian himself—makes this book ideal for an introductory theatre course. *THE ESSENTIAL THEATRE* has established a reputation as one of the most comprehensive, authoritative surveys of the theatre in academia. With vibrant and numerous representations of current and classic performances, this text encourages students to become active theatergoers and fans.

Writing with Light Vittorio Storaro 2019-07-30 A unique tribute to art films as seen through the eyes of master cinematographer Vittorio Storaro, the winner of three Academy Awards. The volume is a compendium of Storaro's extraordinary fifty-year career and a tribute to the creative sources of his work, as celebrated through more than 500 illustrations that reflect his singular style. In cinematography, there is not just one kind of light, but an infinite range of variants: not only the day and night specified in the screenplays, but also the daylight and artificial light, the darkness and the twilight, the sunrise and the sunset, the sun and the moon. And each one tells a story, expresses an idea or an emotion, and digs down into the subconscious. "The Muses" are the female figures of Greek mythology who have inspired the cinematography of Storaro in terms of aesthetics, light, color, and value.
