Millionaire by Thirty Douglas R. Andrew 2008-04-30 Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in Millionaire by Thirty, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

Hav Jan Morris 2011-08-30 A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published Last Letters from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

The Book of L G. Rozenberg 2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Blood-Kissed Sky J. A. London 2012-12-26 The second book in a romantic and drama-packed trilogy perfect for fans of Rachel Vincent, Julie Kagawa, and Alyson Noel. Lusciously romantic and full of action-packed drama, readers will be swept away by this thrilling novel. Dawn Montgomery knows that monsters really do come out at night—after all, they are her job. It's just after the thirty-year war between vampires and humans, and as an ambassador between the two sides (a role she inherited when her parents were killed), Dawn quickly learns that balancing schoolwork, teen life, and the requests of Lord Valentine, the most frightening vampire in the region, isn't easy. There's nowhere left to hide. I thought vampires were our enemies—they controlled our lives, isolated our cities, and demanded our blood—until I met Victor. With Victor taking over as the new Lord Valentine, things were supposed to get better. Instead, they're worse than ever. Day Walkers, a new breed of vampires who can walk in the sun, are terrorizing the city. Blood supplies are low, and if Victor's vampires don't get enough, they will

become infected with the Thirst—a disease that will turn them into mindless killers. To stop it, I must journey across the desolate wasteland to the very place where the sickness began. I can only hope that the answers that await me are enough to save us all...before it's too late.

You Gotta Be Kidding! Workman Publishing 2020-07-14 Gross, embarrassing, and just plain silly questions about boogers, bugs, smelly socks, itchy scabs, and more! Adapted from the hugely popular board game, this interactive and completely engaging book serves up hundreds of bizarre, embarrassing, sometimes ethical and sometimes stomach-churning dilemmas that kids will love to pose to their friends and siblings, whether in the backseat, on a sleepover, at a party, on a rainy day, or during a lull in the lunchroom (if you dare). Ponder the icky: Would you rather eat 10 pounds of cheese -OR- a bucket of peanut butter—with nothing to drink? The exponentially icky: Would you rather drink liquid found leaking from a garbage can -OR- chew on a hairy clump found between the cushions of an old couch? The fantastic: Would you rather be able to talk with all animals -OR- be able to understand all languages? The priority-testing: As a soccer player, would you rather mess up and score a goal for the other team but still have your team win -OR- play your best game ever even though your team loses? And the hair-raising: Would you rather swim across a river that is filled with crocodiles -OR- spend the night on an island where man-eating tigers live? Fascinating sidebars throughout are filled with interesting ancillary information—the nature of drool, left-handedness vs. right-handedness, what's dangerously filthy and what's just gross, why we blush when we're embarrassed—so kids can learn something as they laugh!

Looptail Bruce Tip 2014-04-03 Looptail is Bruce Poon Tip's extraordinary first-person account of his entrepreneurial instincts to start and develop G Adventures, the highly successful international travel adventure company - and along the way he reveals his unusual management secrets that not only keep his employees fully engaged and energized but also keep his customers extremely happy. His unique approach has worked in marvellous ways. Poon Tip has created an entirely new and refreshing approach to management. For example, there is no CEO at G Adventures - instead, every employee is a CEO, empowered to make instantaneous decisions to help clients on the spot. But while there's no CEO, there is a company Mayor, who take the pulse of corporate morale. There's no HR department - but there is a Talent Agency and company Culture Club. It hasn't always been easy to try to balance his desire for a socially responsible company along with the desire to generate profits. But thanks to Poon Tip's vision, G Adventures has flourished and has done its best to maintain its looptail approach. In short, it's been an extraordinary ride, and in many ways G Adventures is at the vanguard of what modern-day companies are beginning to look like.

Colonial Lives Richard E. Boyer 2000 Colonial Lives offers a rich variety of archival documents in translation which bring to life the political and economic workings of Latin American colonies during 300 years of Spanish rule, as well as the day-to-day lives of the colonies' inhabitants. Intended to complement textbooks such as Burkholder and Johnson's Colonial Latin America by presenting students with primary sources -- the raw materials on which the facts in other textbooks are based -- this reader strives to illustrate the impact of issues such as race, class, gender, sexuality, culture and religion in the daily lives of both natives and colonists alike. The concerns, struggles and perspectives of the inhabitants of colonial Latin America are reflected in transcripts of civil and criminal court cases, administrative reviews, ecclesiastical investigations, Inquisition trials, wills, and letters the editors have included in this reader. Each document is prefaced by an introduction that places it in the social and political context of the period. The book also includes a glossary of terms and lists of suggested further readings. Most uniquely, the book offers helpful thematic cross-referencing sections and an index of themes which allow instructors to easily adapt the book to their courses and to assign readings according to the criteria of their own specific curriculums.

Squirrels on Skis J. Hamilton Ray 2013-09-10 This new Beginner Book about manic skiing squirrels—by J. Hamilton Ray with illustrations by Pascal Lemaitre—has the feeling of an old classic read-aloud. "Nobody knew how the mania grew. First there was one, and then there were two. Three more came gliding from under the trees. LOOK! On the hill. Those are squirrels on skis! Below lay the town, snow-covered and still. Not a sound could be heard. All was silent, until . . . Swwwishhhh swooped the skiers, all dressed for play. Eighty-five squirrels and more on the way!" As you can imagine, the townsfolk are NOT amused. Can intrepid reporter Sally Sue Breeze find out where the squirrels are getting their skis-and make them stop skiing long enough to eat lunch-before pest-control guy Stanley Powers sucks them up in his vacuum device? (Don't worry—Sally triumphs in a most unexpected way.) With delightfully understated, funny illustrations by Pascal Lemaitre, this is the perfect book for beginning readers to curl up and chill out with on a snow day—or any day! Originally created by Dr. Seuss, Beginner Books encourage children to read all by themselves, with simple words and illustrations that give clues to their meaning.

Astrophysics Processes Hale Bradt 2008-09-25 Bridging the gap between physics and astronomy textbooks, this book provides step-by-step physical and mathematical development of fundamental astrophysical processes underlying a wide range of phenomena in stellar, galactic, and extragalactic astronomy. The book has been written for upper-level undergraduates and beginning graduate students, and its strong pedagogy ensures solid mastery of each process and application. It contains over 150 tutorial figures, numerous examples of astronomical measurements, and 201 exercises. Topics covered include the Kepler–Newton problem, stellar structure, binary evolution, radiation processes, special relativity in astronomy, radio propagation in the interstellar medium, and gravitational lensing. Applications presented include Jeans length, Eddington luminosity, the cooling of the cosmic microwave background (CMB), the Sunyaev–Zeldovich effect, Doppler boosting in jets, and determinations of the Hubble constant. This text is a stepping stone to more specialized books and primary literature.

Password-protected solutions to the exercises are available to instructors at www.cambridge.org/9780521846561.
