Motivation, Leadership and Curriculum Design Caroline Koh 2015-01-06 This book discusses the links between the basis of motivational, leadership and curricular constructs with regards to 21st century and net-generation learning. It brings together recent developments in motivation, educational leadership and curriculum design in order to offer a better understanding of what is already known and what is yet to be explored in these fields. It consists of a collection of findings on recent educational developments, including topics such as motivating the 21st century learner, leadership practices and influences, curriculum design and models, novel learning environments and 21st century learners and their needs.

Work the Future! Today Whitney Vosburgh 2018-08-13 Dan Pink, author of DRIVE: "WTF! is a paeon to the power of story—a new story based on purpose, not on profit. With a mind toward sustaining the planet rather than just amassing money, this guides you to finding and aligning your purpose, passion and goals to create a new life-embracing story for yourself, your organization and the world."

Halting State Charles Stross 2007-10-02 "Halting State [is] a near-future story that is at once over-the-top and compellingly believable." — Vernor Vinge, author of Rainbows End In the year 2018, Sergeant Sue Smith of the Edinburgh constabulary is called in on a special case. A daring bank robbery has taken place at Hayek Associates—a dot-com start-up company that's just floated onto the London stock exchange. But this crime may be a bit beyond Smith's expertise. The prime suspects are a band of marauding orcs with a dragon in tow for fire support. The bank is located within the virtual reality land of Avalon Four, and the robbery was supposed to be impossible. When word gets out, Hayek Associates and all its virtual "economies" are going to crash hard. For Smith, the investigation seems pointless. But the deeper she digs, the bigger the case gets. There are powerful players—both real and pixelated—who are watching her every move. Because there is far more at stake than just some game-head's fantasy financial security...

Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings

of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Node.js for Embedded Systems Patrick Mulder 2016-10-10 How can we build bridges from the digital world of the Internet to the analog world that surrounds us? By bringing accessibility to embedded components such as sensors and microcontrollers, JavaScript and Node.js might shape the world of physical computing as they did for web browsers. This practical guide shows hardware and software engineers, makers, and web developers how to talk in JavaScript with a variety of hardware platforms. Authors Patrick Mulder and Kelsey Breseman also delve into the basics of microcontrollers, single-board computers, and other hardware components. Use JavaScript to program microcontrollers with Arduino and Espruino Prototype IoT devices with the Tessel 2 development platform Learn about electronic input and output components, including sensors Connect microcontrollers to the Internet with the Particle Photon toolchain Run Node.js on single-board computers such as Raspberry Pi and Intel Edison Talk to embedded devices with Node.js libraries such as Johnny-Five, and remotely control the devices with Bluetooth Use MQTT as a message broker to connect devices across networks Explore ways to use robots as building blocks for shared experiences

21st Century C Ben Klemens 2012-10-15 Throw out your old ideas of C, and relearn a programming language that's substantially outgrown its origins. With 21st Century C, you'll discover up-to-date techniques that are absent from every other C text available. C isn't just the foundation of modern programming languages, it is a modern language, ideal for writing efficient, state-of-the-art applications. Learn to dump old habits that made sense on mainframes, and pick up the tools you need to use this evolved and aggressively simple language. No matter what programming language you currently champion, you'll agree that C rocks. Set up a C programming environment with shell facilities, makefiles, text editors, debuggers, and memory checkers Use Autotools, C's de facto cross-platform package manager Learn which older C concepts should be downplayed or deprecated Explore problematic C concepts that are too useful to throw out Solve C's string-building problems with C-standard and POSIX-standard functions Use modern syntactic features for functions that take structured inputs Build high-level object-based libraries and programs Apply existing C libraries for doing advanced math, talking to Internet servers, and running databases

Practical Hardware Pentesting Jean-Georges Valle 2021-04-01 Explore embedded systems pentesting by applying the most common attack techniques and patterns Key Features Learn various pentesting tools and techniques to attack and secure your hardware infrastructure Find the glitches in your hardware that can be a possible entry point for attacks Discover best practices for securely designing products Book Description Hardware pentesting involves leveraging hardware interfaces and communication channels to find vulnerabilities in a device. Practical Hardware Pentesting will help you to plan attacks, hack your embedded devices, and secure the hardware infrastructure. Throughout the book, you will see how a specific device works, explore the functional and security aspects, and learn how a system senses and communicates with the outside world. You will start by setting up your lab from scratch and then gradually work with an advanced hardware lab. The book will help you get to grips with the global architecture of an embedded system and sniff on-board traffic. You will also learn how to identify and formalize threats to the embedded system and understand its relationship with its ecosystem. Later, you will discover how to analyze your hardware and locate its possible system vulnerabilities

before going on to explore firmware dumping, analysis, and exploitation. Finally, focusing on the reverse engineering process from an attacker point of view will allow you to understand how devices are attacked, how they are compromised, and how you can harden a device against the most common hardware attack vectors. By the end of this book, you will be well-versed with security best practices and understand how they can be implemented to secure your hardware. What you will learn Perform an embedded system test and identify security critical functionalities Locate critical security components and buses and learn how to attack them Discover how to dump and modify stored information Understand and exploit the relationship between the firmware and hardware Identify and attack the security functions supported by the functional blocks of the device Develop an attack lab to support advanced device analysis and attacks Who this book is for This book is for security professionals and researchers who want to get started with hardware security assessment but don't know where to start. Electrical engineers who want to understand how their devices can be attacked and how to protect against these attacks will also find this book useful.

Ubertrends Michael Tchong 2017-05-04 Ubertrends examines eight driving forces behind the vast majority of trends and innovations taking place in society today. Ubertrends are massive waves cascading through society, leaving many subrends in their wake. The Digital Lifestyle Ubertrend, today's biggest wave, propels a host of subrends. Unlike typical trends, Ubertrends are changing America's values, which explains why the Digital Lifestyle is contributing to permanent behavioral changes. Ubertrends helps readers connect the dots, by providing more context for how the future is developing. Other Ubertrends described include Time Compression -- The Acceleration of Life; Unwired -- Control Enthusiast Generation, Generation X-tasy -- Been There, Done That, Voyeurgasm -- I Like to Watch; Fountain of Youth -- Rejuvenating Body, Spirit and Environment; and WAF -- The Ascent of Woman.

Scars, Marks & Tattoos Jacqueline Caruso 2021-03-31 I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

The First-Year English Teacher's Guidebook Sean Ruday 2018-04-30 The First-Year English Teacher's Guidebook offers practical advice and recommendations to help new English teachers thrive in the classroom. Each chapter introduces a concept crucial to a successful first year of teaching English and discusses how to incorporate that concept into your daily classroom practice. You'll find out how to: Clearly communicate instructional goals with students, parents, and colleagues; Incorporate students' out-of-school interests into the curriculum; Use assignment-specific rubrics to respond to student writing in meaningful ways; Integrate technology into ELA instruction; Conduct student-centered writing conferences; Make time for self-care and self-improvement; and much, much more. Additionally, the guidebook provides a number of forms, templates, graphic organizers, and writing prompts that will enable you to put the author's advice into immediate action. These tools are available for download on the book's product page: www.routledge.com/9781138495708.

User Centric Media Petros Daras 2013-01-02 This book constitutes the thoroughly refereed post-conference proceedings of the First International Conference, UCMedia 2009, which was held on 9-11 December 2009 at Hotel Novotel Venezia Mestre Castellana in Venice, Italy. The conference's focus was on forms and production, delivery, access, discovery and consumption of user centric media.

After a thorough review process of the papers received, 23 were accepted from open call for the main conference and 20 papers for the workshops.

Contractual Control in the Supply Chain Louise Vytöpil 2015-06-01 This book investigates the legal measures that multinational companies in the Netherlands, England and California take to govern corporate social responsibility aspects of their supply chains and the legal implications these measures have in terms of contract and liability law.

Programming Languages: History and Fundamentals Jean E. Sammet 1969 The primary purpose of this book is to serve as a reference for an overall view of higher level languages. The book brings together in one place, and in a consistent fashion, fundamental information on programming languages, including history, general characteristics, similarities, and differences. A second purpose of the book is to provide specific basic information on all the significant, and most of the minor, higher level languages developed in the United States. The third purpose of the book is to provide history and perspective for this particular aspect of the programming field. - Preface.

Making & Doing Gary Downey 2021-08-17 How ten making & doing projects expand STS scholarship through a focus on knowledge expression and knowledge travel in addition to knowledge production. Making & doing projects expand STS scholarship to include the trajectories of STS knowledge flow beyond the boundaries of the field by actively interweaving knowledge expression and travel with knowledge production. In this edited volume, contributors from around the world present and critically assess ten empirical making & doing projects. They recount how their projects advance STS, and describe how they themselves learn from their interlocutors and the settings in which they do and share their STS work. A coda explains how the infrastructures of STS scholarship are broadening to include practices of making & doing. The contributors examine and reflect upon their dilemmas, frustrations, and failures, especially when these generate new practices that might not have occurred had their work not taken the form of making and doing scholarship. While each project raises a distinct set of scholarly issues, all of the projects include practices that express STS knowledge through "STS sensibilities" and attach those sensibilities to practices in empirical fields. The ten projects include one each in Argentina, Taiwan, Canada, and Denmark; two in the US; one in Austria, the UK, and multiple countries in Africa and Asia; one in the US and Latin America; one in the Netherlands and Australia; and one in an international network that includes members from Europe, the Americas, and Australia.

Security and Privacy Protection in Information Processing Systems Lech J. Janczewski 2013-07-03 This book constitutes the refereed proceedings of the 28th IFIP TC 11 International Information Security and Privacy Conference, SEC 2013, held in Auckland, New Zealand, in July 2013. The 31 revised full papers presented were carefully reviewed and selected from 83 submissions. The papers are organized in topical sections on malware, authentication and authorization, network security/cryptography, software security, policy compliance and obligations, privacy protection, risk analysis and security metrics, social engineering, and security management/forensics.

UC/OS-III Jean J Labrosse 2010-02-16 This two-part book puts the spotlight on how a real-time kernel works using Micrium's C/OS-III kernel as a reference. Part I includes an overview of the operation of real-time kernels, and walks through various aspects of C/OS-III implementation and usage. Part II provides application examples (using the versatile Renesas YRDKSH7216 Evaluation Board, available separately) that enable readers to rapidly develop their own prototypes. This book is written for serious embedded systems programmers, consultants, hobbyists, and students interested in understanding the inner workings of a real-time kernel. C/OS-III is not just a great learning platform, but also a full commercial-grade software package, ready to be part of a wide range of products. C/OS-III is a highly portable, ROMable, scalable, preemptive real-time, multitasking kernel designed specifically to address the demanding requirements of today 's embedded systems. C/OS-III is the successor to the highly popular C/OS-II real-time kernel but can use most of C/OS-II 's ports with minor modifications. Some of the features of C/OS-III are: Preemptive multitasking with round-robin scheduling of tasks at the same priority Supports and unlimited number of tasks and other kernel objects Rich set of services: semaphores, mutual exclusion semaphores with full priority inheritance, event flags, message queues, timers, fixed-size memory block management, and more. Built-in performance measurements

Applied Linguistics and Materials Development Brian Tomlinson 2013-01-31 Applies applied linguistic theories to the development of materials for language learning to add new depth to the field.

The New Cockney S. Fox 2015-01-01 The New Cockney provides a sociolinguistic account of speech variation among adolescents in the 'traditional' East End of London. Embedded in its social context, it focuses on the interaction and social practices within a single community and highlights some of the possible mechanisms for language change.

New Dimensions in Photo Processes Laura Blacklow 2012-09-10 Clear instructions and step-by-step photographs teach you how to mix chemicals and apply light-sensitive emulsions by hand, how to create imagery in and out of the darkroom, how to translocate Polaroid photos and magazine and newspaper pictures, and how to alter black-and-white photographs. A color portfolio highlights the work of internationally known artists such as Robert Rauschenberg, Todd Walker, and most recently Doug and Mike Starn, and an invaluable list of supply sources (including e-mail addresses) from throughout North America and Europe is included at the end of the book. Setting aside old distinctions between photographer and nonphotographer, New Dimensions in Photo Processes invites artists in all media to discover nonsilver imaging techniques. Painters, printmakers, fiber artists, sculptors, illustrators and photographers alike will find this a valuable, practical text outlining creative processes that require little or no knowledge of photography and chemistry.

Beyond Foundations Thomas J. Grites 2016-09-19 Sharpen advising expertise by exploring critical issues affecting the field Beyond Foundations, a core resource for experienced academic advisors, gives practitioners insight into important issues affecting academic

advising. In addition to gaining understanding of foundational concepts and pressing concerns, master advisors engage with case studies to clarify their roles as educators of students, as thought leaders in institutions, and as advocates for the profession. Pillar documents—the NACADA Core Values, NACADA Concept of Academic Advising, and CAS Standards—serve as sources of both information and inspiration for those seeking to improve advising. New strategies inform advisors helping a diverse student population delineate meaningful educational goals. Each chapter prompts productive discussions with fellow advisors interested in cultivating advising excellence. To promote advisor influence in higher education, experienced contributors explain new trends—including the impact of external forces and legal issues on postsecondary institutions—and the evolution of advising as a profession and a field of inquiry. Expert insight and practical focus contribute to the development of experienced advisors. Use existing resources in new ways to master advising roles and encourage student success Apply theory to advance advising practice Create and optimize professional development opportunities Establish recognition for the contributions of academic advisors to the institution and higher education Face challenges created by the changing higher education landscape Advisors must meet the expectations of students, parents, faculty members, administrators, and outside agencies, all while navigating an increasingly complex range of issues presented by a student population unlike any that has come before. Beyond Foundations provides the insight and clarity advisors need to help students achieve their educational goals and to advance the field.

The Counselor and the Law Thomas Burgum 1975

Healing Criminal Justice Tauber Jeffrey 2019-07-08 In *Healing Criminal Justice*, Judge Tauber paints a picture of how community can impact our conception of crime, criminals, and drug offenders in particular. He points to his own development as a musician and traveler as an important preset to his understanding of the vital role of community in the criminal justice system. Finally, he lays out his vision of a future where problem-solving courts based on the successful drug court model, reshape the court system, how the courts and judges see their role, and how society can return to a reliance on community, rather than an over-reliance on imprisonment as the greatest of crime fighters. Judge Tauber has written extensively on court-ordered rehabilitation systems and drug policy, including the first drug court manual published in the nation, *Drug Courts: A Judicial Manual*.

Gaawin Gindaaswin Ndaawsii / I Am Not a Number Jenny Kay Dupuis 2019-09-10 The dual language edition, in Nishnaabemwin (Ojibwe) Nbisiiing dialect and English, of the award-winning *I Am Not a Number*. When eight-year-old Irene is removed from her First Nations family to live in a residential school she is confused, frightened, and terribly homesick. She tries to remember who she is and where she came from, despite the efforts of the nuns who are in charge at the school and who tell her that she is not to use her own name but instead use the number they have assigned to her. When she goes home for summer holidays, Irene's parents decide never to send her and her brothers away again. But where will they hide? And what will happen when her parents disobey the law? Based on the life of co-author Jenny Kay Dupuis' grandmother, *I Am Not a Number* is a hugely necessary book that brings a terrible part of Canada's history to light in a way that children can learn from and relate to.

Stretch Blow Molding Ottmar Brandau 2016-08-10 Stretch Blow Molding, Third Edition, provides the latest on the blow molding process used to produce bottles of the strength required for carbonated drinks. In this updated handbook, Ottmar Brandau introduces the technology of stretch blow molding, explores practical aspects of designing and running a production line, and looks at practical issues for quality control and troubleshooting. As an experienced engineer, manager, and consultant, Brandau's focus is on optimizing the production process, improving quality, and reducing cycle time. In this new edition, the author has thoroughly reviewed the content of the book, providing updates on new developments in stretch blow molding, including neck sizes, new equipment and processes, and the economics of the process. The book is a thoroughly practical handbook which provides engineers and managers with the toolkit to improve production and engineering aspects in their own businesses, allowing them to save money, increase output, and improve competitiveness by adopting new technologies. Provides knowledge and understanding of the latest technological and best practice developments in stretch blow molding Includes money saving, practical strategies to optimize the production process, improve quality, and reduce cycle times Provides a guide to the training of operators, as well as tactics on how to troubleshoot when products are faulty, productivity is low, or machinery is not operating as expected

Autumn's Kiss Bella Thorne 2016-06-07 When high school junior Autumn's wish-granting diary stops working, she is given a map that will take her wherever she wants to go, but may lead to life-changing consequences.

The Oxford Thesaurus Laurence Urdang 1997 First published in 1991, the very successful first edition of The Oxford Thesaurus has now sold over 126,000 copies. This new edition (NB new format), which for the first time includes antonyms in the main A-Z text, along with many additional new synonyms, broadens the book's appeal still further. The Oxford Thesaurus remains the most useful A-Z thesaurus available today, with more practical guidance for the user than any other competing title. Around 350,000 synonyms and antonyms, covering general English as well as thousands of regional and idiomatic words and expressions, are listed in A-Z form for ease of reference. Generous and detailed labelling shows how to use synonyms, and example sentences throughout make it even easier to select the correct synonym. The most useful synonyms (ie those that are closest in meaning to the headword) are listed first - a more helpful arrangement than a simple alphabetical listing under the headword. If the word for which you seek an alternative is not to be found as a headword, you can simply turn to the synonym index which lists 265,000 synonyms and shows you under which headword each synonym is located. In addition, all synonyms which also have their own headword entry (at which further related words may be found) are indicated by a simple cross-reference symbol. On the first edition: 'handier than Roget both in being alphabetical and in offering example-sentences. The mot juste in just a mo.' Prof. Sir Randolph Quirk, The Observer.

Education, Education, Education E. C. Wragg 2004-01-22 When New Labour came into office in 1997, its commitment to 'education, education, education' captured the imagination of the public. This collection of humorous articles by Ted Wragg between 1998 to 2003 exposes the real state of education during this period, when educational policy was never far from the headlines. No one escapes Ted's

sharp-shooting wit: from the 'blamers and shamers' who try to turn teacher-bashing into a national pastime to the 'pale policy wonks' in the Department of Education, who issue regular hare-brained initiatives from the mysterious 'Tony Zoffis'. Split into seven issue-focused chapters, this hilarious collection will be a tonic for anyone finding themselves unsure whether to laugh or cry about recent developments in the world of education.

Looptail Bruce Tip 2014-04-03 Looptail is Bruce Poon Tip's extraordinary first-person account of his entrepreneurial instincts to start and develop G Adventures, the highly successful international travel adventure company - and along the way he reveals his unusual management secrets that not only keep his employees fully engaged and energized but also keep his customers extremely happy. His unique approach has worked in marvellous ways. Poon Tip has created an entirely new and refreshing approach to management. For example, there is no CEO at G Adventures - instead, every employee is a CEO, empowered to make instantaneous decisions to help clients on the spot. But while there's no CEO, there is a company Mayor, who take the pulse of corporate morale. There's no HR department - but there is a Talent Agency and company Culture Club. It hasn't always been easy to try to balance his desire for a socially responsible company along with the desire to generate profits. But thanks to Poon Tip's vision, G Adventures has flourished and has done its best to maintain its looptail approach. In short, it's been an extraordinary ride, and in many ways G Adventures is at the vanguard of what modern-day companies are beginning to look like.

An American Soldier in Vietnam Steven Alexander 2013-07 After living a normal life for twenty years, a war halfway around the world forever alters the life of a young man... The 1960s were a turbulent time for the United States. Anti-war riots, race riots, and gender equality protests shook America and permanently changed the composition of the American way of life. But for Ray Anderson, life was peaceful and full of normalcy. That is, until his number was drawn. Unlike others who dodged the draft, Anderson, knew his country needed him and accepted the call to arms. Leaving behind everything he knew and loved, Anderson embarked upon a new life, one in which he must fight to preserve the freedom of world, by attempting to stop the tyrannical aggression the North Vietnamese inflict upon its Southern brothers and sisters. After witnessing the atrocities of war, Anderson comes home to ungrateful and unsympathetic protestors, heckling him as he attempts to reenter the "real world." An American Soldier in Vietnam is a means of conveying the harsh conditions American soldiers faced in Vietnam, and the cruel treatment Veterans experienced at the hands of their fellow Americans.

High Tide Jude Deveraux 2012-12-11 Fiona is the creator of fashion doll sensation Kimberley, and is quite satisfied with her career-focused life. Yet when her boss informs her that she must win over a new account by going camping with the creator of a hit children's TV show, she is extremely reluctant. Nevertheless, she goes to Florida to meet Roy and his Guide Ace Montgomery. When Roy is found dead with Fiona holding the bloody knife, she becomes the prime suspect - though she has no recollection of what happened. Things get worse when she learns that Roy, until now a stranger to her, left her all the proceeds from his new TV show, giving her a strong motive for murder. Suddenly, she and Ace find themselves on the run, and being condemned by the press for murder. They must prove their innocence by discovering the true motive and murderer of Roy. Fiona and Ace figure out they are linked through her father, and it is then that Fiona learns the secrets of her family's past, turning her world upside down.

The New Advisor Guidebook Pat Folsom 2015-08-21 This is an exciting time to be an academic advisor—a time in which global

recognition of the importance of advising is growing, research affirms the critical role advising plays in student success, and institutions of higher education increasingly view advising as integral to their missions and essential for improving the quality of students' educational experiences. It is essential that advisors provide knowledgeable, realistic counsel to the students in their charge. The New Advisor Guidebook helps advisors meet this challenge. The first and final chapters of the book identify the knowledge and skills advisors must master. These chapters present frameworks for setting and benchmarking self-development goals and for creating self-development plans. Each of the chapters in between focuses on foundational content: the basic terms, concepts, information, and skills advisors must learn in their first year and upon which they will build over the lengths of their careers. These chapters include strategies, questions, guidelines, examples, and case studies that give advisors the tools to apply this content in their work with students, from demonstrations of how student development theories might play out in advising sessions to questions advisors can ask to become aware of their biases and avoid making assumptions about students to a checklist for improving listening, interviewing, and referral skills. The book covers various ways in which advising is delivered: one-to-one, in groups, and online. The New Advisor Guidebook serves as an introduction to what advisors must know to do their jobs effectively. It pairs with *Academic Advising Approaches: Strategies That Teach Students to Make the Most of College*, also from NACADA, which presents the delivery strategies successful advisors can use to help students make the most of their college experience.

What Happened Scott McClellan 2008 The former White House press secretary examines how and why the Bush administration went awry, providing a look at George W. Bush and his top aides in terms of such crises as Hurricane Katrina, the Iraq war, and Washington's political infighting.

New Dimensions in Photo Processes Laura Blacklow 2018-05-04 *New Dimensions in Photo Processes* invites artists in all visual media to discover contemporary approaches to historical techniques. Painters, printmakers, and photographers alike will find value in this practical book, as these processes require little to no knowledge of photography, digital means, or chemistry. Easy to use in a studio or lab, this edition highlights innovative work by internationally respected artists, such as Robert Rauschenberg, Chuck Close, Mike and Doug Starn, and Emmet Gowin. In addition to including new sun-printing techniques, such as salted paper and lumen printing, this book

has been updated throughout, from pinhole camera and digital methods of making color separations and contact negatives to making water color pigments photo-sensitive and more. With step-by-step instructions and clear safety precautions, *New Dimensions in Photo Processes* will teach you how to: Reproduce original photographic art, collages, and drawings on paper, fabric, metal, and other unusual surfaces. Safely mix chemicals and apply antique light-sensitive emulsions by hand. Create imagery in and out of the traditional darkroom and digital studio. Relocate photo imagery and make prints from real objects, photocopies, and pictures from magazines and newspapers, as well as from your digital files and black and white negatives. Alter black and white photographs, smart phone images, and digital prints.
